Just to Remind How Powerful a Connection Can Be

What happened:

Akshita Bisht, a student, posted a random comparison between Aman Gupta and Ted Mosby on LinkedIn. She had no agenda, no pitch, no expectations. She just found the parallel interesting and decided to post it.

What happened next:

Aman Gupta personally commented on her post, said he liked the creativity, and told her to reach out if she was looking for a change. He offered her a spot at his new venture OFF/BEAT.

The lesson:

One creative post. One real thought. Zero expectations. And the founder of a Rs 10,000 Cr brand reached out to her. You never know which post sets things in motion. That is what personal branding does.

Mesa SCHOOL OF BUSINESS

Today's Agenda

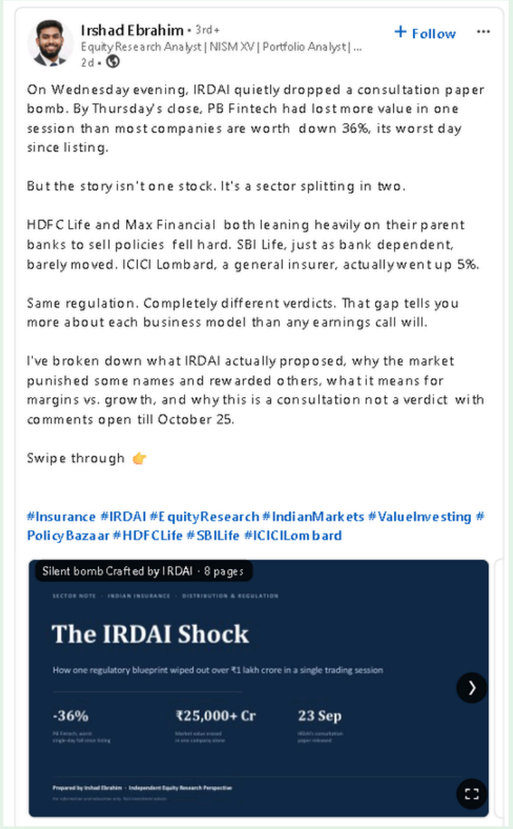

01	Premise: Generic AI vs Human	5 min
02	Mining Topics & Ideas with Claude	20 min
03	Going Deeper + Building Your Voice	25 min
04	The 10-Minute Post System + Live Demo	15 min
05	Graphics & Imagery: The Visual Craft	20 min
06	Close + Assignment Brief	5 min

+ Follow

On Wednesday evening, IRDAI quietly dropped a consultation paper bomb. By Thursday's close, PB Fintech had lost more value in one session than most companies are worth down 36%, its worst day since listing.

But the story isn't one stock. It's a sector splitting in two.

HDFC Life and Max Financial both leaning heavily on their parent banks to sell policies fell hard. SBI Life, just as bank dependent, barely moved. ICICI Lombard, a general insurer, actually went up 5%.

Same regulation. Completely different verdicts. That gap tells you more about each business model than any earnings call will.

I've broken down what IRDAI actually proposed, why the market punished some names and rewarded others, what it means for margins vs. growth, and why this is a consultation not a verdict with comments open till October 25.

Today, Bacca Bucci is a ₹130 CR brand. But if you saw us in the early days, you'd never bet on us.

Shoe boxes falling over our heads because we had no space.

Orders piling up. No staff, no backup—just Natwar Agrawal and I, packing, shipping, running!

No weekends, no holidays, just survival.

People cry about 100-hour work weeks and work-life balance. Bro, for us, 100 hours was a luxury— it meant it was an easy week.

People think startups make founders rich. For us, even drawing a basic salary felt like a privilege.

And yet, people love talking about startup valuation, funding rounds, and fancy headlines.

Truth is—this game is ugly. It's brutal. It'll kick your ass every damn day.

You either take the punches and keep swinging, or you get knocked out.

Simple!

So if you are into the world of entrepreneurship because Instagram and LinkedIn made it look cool...

Congrats—you've just signed up for 100-hour work weeks, 1,000 rejections, and a 99% failure rate. No motivational quotes will save you now. 😈🔥

I think all my founder friends would agree :)

Natwar Agrawal, Mayank Arya, Dhiraj Agarwal, Prabhkiran Singh, Siddharth DUNGARWAL, Aakash Anand, Rahul Yadav, Aditya Khanna, Ashutosh Valani, Chinu Kala, Sidhant Keshwani, Puneet Gupta, Sumit Jasoria

The Premise: Can You Tell?

One is hollow generic AI. One is human. Quick vote: which is machine-written?

POST A

POST B

It is obvious. The platform now penalizes generic AI output. Your audience can smell it too. AI used wrong makes you sound like everyone. Used right, it makes you faster while sounding more like you.

Mesa SCHOOL OF BUSINESS

Why Most AI Content Fails

- **The tone is mostly bland**

  Read like a press release. Zero personality. Could have been about anyone. LinkedIn buried it.

- **Their is no topic relevance**

  e.g. 'Top 5 Tips' listicle. No story, no tension, no opinion. Reads like a blog no one asked for.

- **The motivational quote post**

  No credibility backing it. Feels hollow. Gets reactions from bots, silence from humans.

The fix: feed it YOUR real context, YOUR voice, YOUR experiences.

Mesa
SCHOOL OF BUSINESS

Prompt: The Topic Bank

PROMPT **Mining 30 Ideas from Your Real Work**

"You are my LinkedIn content strategist. My positioning is [paste one-line positioning]. My pillars are [1], [2], [3]. My audience is [describe]. Five real things I did/learned recently: [rough bullets]. Generate 30 specific post ideas inside my pillars that matter to my audience. For each: a one-line angle and the core emotion (controversial, curiosity, humor, inspiration, nostalgia). No generic advice-posts, tie each to my real experience or a current reality in my space."

The rule: feed Claude your real context (pillars, audience, real experiences).

Mesa
SCHOOL OF BUSINESS

Prompt: Topical Mining

PROMPT **Finding Non-Obvious Angles in Live News**

"Here are three recent developments in [my industry]: [paste]. For each, give a non-obvious angle connecting it to [one pillar] and to what my audience of [audience] cares about. Avoid the obvious take. What is the second-order insight most people miss?"

LIVE EXAMPLES FOR MESA STUDENTS

Zepto raising at $5B+ valuation	**What does the quick-commerce war mean for your D2C client's unit economics?**
SEBI tightening F&O rules for retail	**How does regulation reshape the fintech content playbook?**
Meta x CRED deal	**What does a platform acquisition tell you about building in public as fundraising infrastructure?**

Mesa
SCHOOL OF BUSINESS

Same Prompt, Different Students

How the topic bank prompt changes based on who you are at Mesa:

The D2C Operator	Positioning: Early-stage consumer brand builder documenting growth experiments Pillars: Consumer research, supply chain lessons, brand-building in India Audience: Founders, VCs, D2C Twitter
The Finance Student	Positioning: MBA student breaking down markets through a builder's lens Pillars: Indian market analysis, fintech disruption, personal investing journey Audience: Finance professionals, startup founders, MBA peers
The Tech Builder	Positioning: Engineer building in public at the intersection of AI and product Pillars: Product thinking, AI use cases in India, startup engineering culture Audience: PMs, engineers, early-stage founders
The Healthcare Founder	Positioning: Building India's healthcare infrastructure one hospital at a time Pillars: Hospital ops, Bharat healthcare gaps, founder mental health Audience: Healthcare operators, impact investors, policy watchers

Prompt: Go Deeper

PROMPT **Making Claude Interrogate YOU**

An idea is not a post. The substance has to stay yours. This prompt surfaces the specific details, numbers, and tension only YOU would know.

"I want to write about [idea]. Do not write it yet. First ask me 6 sharp questions that surface the specific details, numbers, and tension only I would know. Then wait."

EXAMPLE: What Claude might ask a Mesa D2C student writing about consumer research

- 1. How many interviews did you actually conduct, and over how many days?
- 2. What was the single most surprising answer you got that changed your assumption?
- 3. Was there a moment where you almost gave up on the research? What happened?
- 4. What did you find that your professor or mentor disagreed with?
- 5. What is one number from your data that would make a stranger stop scrolling?

Mesa
SCHOOL OF BUSINESS

Prompt: Build Your Voice Profile

MOST IMPORTANT PROMPT

A one-time setup so every future prompt sounds like you.

"Here are 5 pieces of my writing that sound most like me: [paste].

Analyze my voice and produce a reusable 'voice profile' I can paste into future prompts, capturing:

- Sentence length and rhythm
- Formality level
- Words I use and words I never use
- How I open and close posts
- Humor, directness, and formatting patterns

Write it as instructions to you, so next time you write in my voice."

SAVE THIS OUTPUT. You will paste it into every future prompt. This is your moat. Without it, Claude writes like everyone.

Mesa
SCHOOL OF BUSINESS

Prompt: Draft in Your Voice

PROMPT **Turning Your Notes into a First Draft**

Rules:

- Anecdotal hook that hides the ending
- No questions in the hook
- One thought per sentence, max 10 words per sentence
- Max 3 rows per paragraph
- No flowery language
- Specific body
- Last 20% opens to a general commentable thought
- Give me two hook options."

Hard boundary: never let the bot invent facts, numbers, or quotes. Never auto-post raw output. Facts and final voice come from you.

Mesa
SCHOOL OF BUSINESS

The 10-Minute Post System

Idea to shipped post. Every time. Without burnout.

1 0 min

Pick an idea from your bank

Open your 30-idea list. Pick the one that has energy today.

2 2 min

Run go-deeper, dump rough answers

Voice-note is fine. Raw bullets are fine. Just get YOUR specifics out.

3 4 min

Run draft-in-your-voice

Paste voice profile + go-deeper answers. Claude gives you two hooks and a full draft.

4 4 min

Rewrite by hand. Ship.

Your voice is the final filter. Read it aloud. If it sounds like you, publish.

Mesa
SCHOOL OF BUSINESS

Graphics & Imagery: Why Visuals Matter

A visual is a job. It is there to stop the scroll, add proof, and humanize you.

1. Kunal Shah's personal photos get 3-5x the engagement of his text-only posts. Face = trust.
2. Nikhil Kamath's podcast clips on LinkedIn consistently outperform his written posts in reach.
3. Ankur Warikoo's carousel breakdowns get saved at 10x the rate of his story posts because they are reference material.
4. Your Mesa demo-day photo beats stock imagery every single time. Authentic beats polished.

Photos: prefer a human face, open body language, warm genuine expression.

Mesa
SCHOOL OF BUSINESS

Personal Photo vs Designed Graphic

Personal Photo

Use for:

- Story and journey posts
- Trust-building content
- Personal reflections
- Demo day, working sessions, team moments

[Add example
personal photo post]

Designed Graphic / Carousel

Use for:

- Frameworks and models
- Data and teardowns
- Market maps
- Anything people SAVE for later

[Add example
carousel post]

Mesa
SCHOOL OF BUSINESS

Live Demo: Watch the 10 Minutes

ANANYA RUNS THE FULL FLOW LIVE ON SCREEN

One real idea. Start to shipped post. So you see the 10 minutes happen.

0:00	Pick idea from topic bank
0:30	Go-deeper, answers 6 questions (rough voice-notes)
2:30	Paste voice profile + answer into draft prompt
3:00	Claude returns two hooks + full draft
4:00	Read draft aloud, rewrite hook and ending by hand
8:00	Adds image (personal photo or Canva graphic)
10:00	Final posts received

Mesa
SCHOOL OF BUSINESS

The Copy-Check (Run It Every Time)

- ✓ Is the wow-factor present? If you cannot name it in one sentence, the post has no reason to exist.
- ✓ Is it data-oriented with a source? Numbers without a source lose credibility. Numbers with a source earn saves.
- ✓ Is the copy highlighted at the right words? Bold the insight, not the filler.
- ✓ Is the length short enough to read at a glance? If it takes more than 15 seconds to scan the graphic, cut it.
- ✓ Is it readable on a phone? Test it. 80% of LinkedIn is consumed on mobile.

Mesa
SCHOOL OF BUSINESS

Friday Post: Week 3

OPTION A

The Carousel Post

Turn a Mesa project into a 7-9 slide teardown or market map, ending on a call-to-engage slide.

Highest-reach format and a save-magnet. Pass the copy-check before shipping.

OPTION B

The 'Behind the Build' Post

A personal photo (demo day, working session) plus a short honest reflection produced through your 10-minute system.

Authentic, human, and proof that you showed up.

Pick one. Ship it this Friday. Produced through the system, passing the copy-check.

Mesa
SCHOOL OF BUSINESS

One thing to remember:

The bot removes friction.
Your voice is still the moat.

Build the system. Trust the system. Ship through the system.
