Company One-Pagers

Case Manual Reference Set

Mesa School of Business

16 companies — 4 flagship (multi-purpose) + 12 single-purpose

Built from public sources for background context ahead of case work. Gaps and cross-source discrepancies are flagged inline rather than smoothed over. Students should still verify anything time-sensitive independently.

Rippling

Flagship | SaaS — HR, IT & Finance Platform

Snapshot

- Founded 2016 by Parker Conrad; HQ San Francisco, CA
- Series G-stage; $16.8B valuation (May 2025 round, $450M raised, incl. $200M employee tender); ~$1.85B total raised
- 20,000+ customers as of May 2025

What They Sell

- Unified HR, IT, and Finance platform: HRIS, payroll, benefits, time & attendance, onboarding, compliance
- Modular add-ons: device/app management (IT cloud), spend management, global payroll, EOR
- Optional PEO (co-employment) layer for smaller companies wanting bundled benefits

Revenue Model & Motion

- Modular subscription, per-employee-per-month (PEPM): base platform ~$8-35 PEPM, add-on modules ~$5-50+ PEPM
- PEO bundle runs ~$100-175 PEPM all-in depending on modules
- Additional transactional revenue: FX, instant wage transfers, corporate card interchange
- Pricing is not public — requires a sales conversation for an exact quote; one-time implementation fee (~5-15% of annual software fee) on top
- Motion: sales-led, land-and-expand — starts with core HRIS, expands as customer adopts more modules

Who Buys It

- Genuinely multi-stakeholder buying committee: HR/CHRO (core buyer), IT leaders (device/app management), Finance (spend, payroll)
- Core segment SMB to mid-market, moving upmarket

Geographies

- HQ San Francisco; European HQ in Dublin; first APAC office in Sydney
- EOR live in 80 countries; HRIS localized across 100+ countries; native payroll in Brazil, Mexico, Philippines, Spain and others
- Large Bengaluru, India office — plans to grow India headcount from 1,000 to 2,000 over three years

Competitive Landscape

- Deel — direct rival in global payroll/EOR. Ongoing federal lawsuit since March 2025: Rippling alleges Deel ran a corporate spy inside Rippling; case has escalated to a DOJ investigation and RICO claims as of 2026, still in discovery with no settlement
- Also competes with Gusto, Justworks, ADP, and traditional PEOs

Proof Points

- 99.5% year-over-year PEO client retention (fall 2024)
- G2 Net Promoter Score of 90 as of January 2026 — roughly 30 points above the Core HR category average
- 10+ product lines each generating over $1M in ARR

Recent Developments

- Deel lawsuit remains active and heavily covered through mid-2026 (discovery phase, DOJ grand jury subpoenas issued Jan 2026)
- Note for the instructor: this is a genuinely rich case, but it's a legal/competitive-intensity story more than a sales-cycle story — decide deliberately whether to use it as bonus texture or leave it out of the buyer/product-focused case

Innovaccer

Flagship | Healthtech — Healthcare Data Cloud

Snapshot

- Founded 2014 by Abhinav Shashank, Kanav Hasija, Sandeep Gupta, Sachin Jaiswal; HQ San Francisco, with a major R&D hub in Noida, India
- Series F; $3.45B valuation (Jan 2025 round); $675M+ total raised across 9 rounds
- Confirmed unicorn status

What They Sell

- Innovaccer Health Cloud: a vendor-neutral data-integration and analytics layer that sits atop EHRs (Epic, Oracle Health/Cerner)
- Population health analytics, care coordination workflows, value-based care tooling, and newer AI agent products

Revenue Model & Motion

- Subscription-based platform access, priced per the scope of data/analytics deployed
- Motion: enterprise sales-led, long cycle — sells into large Integrated Delivery Networks (IDNs), ACOs, payers, life sciences, and government health entities

Who Buys It

- Multi-stakeholder: CIO/IT (interoperability), clinical leadership (care coordination), compliance/quality officers (value-based care metrics), finance (ROI on population-health contracts)

Geographies

- Primarily US-centric (San Francisco HQ, New York hub); R&D and operations base in Noida, India
- Sells into a highly compliance-heavy market (HIPAA and US healthcare regulation)

Competitive Landscape

- Epic Systems and Oracle Health (formerly Cerner) — dominant EHR incumbents (Epic ~35%+ US hospital market); Innovaccer positions as the faster-to-deploy, vendor-neutral layer on top
- Also competes with Health Catalyst, Arcadia, ClosedLoop, Komodo Health, IQVIA

Proof Points

- 39M+ patient records unified; 1,600+ care sites
- Estimated ~14% share of the specialized population health analytics segment (2026 estimate)

Recent Developments

- Acquired CaduceusHealth (May 2026)
- Continued heavy fundraising into 2025-2026 alongside a broader wave of healthcare AI agent investment

GoKwik

Flagship | Ecommerce Enablement — Checkout & RTO Tech

Snapshot

- Founded 2020 by Chirag Taneja, Ankush Talwar, Vivek Bajpai; HQ New Delhi, India
- Series B; ~$128M total raised (per CBInsights) from RTP Global, Sequoia/Peak XV, Matrix Partners India, Think Investments, Z47

What They Sell

- KwikCheckout: one-click checkout supporting UPI, cards, wallets, COD
- Smart COD Suite: AI-driven fraud/RTO (return-to-origin) risk detection at the order level
- WhatsApp-based marketing automation (added via acquisition)

Revenue Model & Motion

- Primarily transaction/success-fee based — charges tied to successful checkouts/GMV processed, not a flat license
- Layered with tiered subscription plans by brand growth stage (early-stage D2C vs. scaling brand tiers)
- Motion: sales-led with a self-serve-flavored entry tier — closer to an 'assisted growth partner' than pure PLG or classic enterprise
- Exact fee percentages are not publicly disclosed — described consistently across sources but no published rate card

Who Buys It

- D2C/ecommerce founders and growth/ops leads (economic buyer)
- Tech/product leads for integration (technical buyer)
- Deal size and cycle length not publicly disclosed

Geographies

- Primary market: India (D2C/ecommerce brands)
- Early international expansion into the UK (dedicated UK pricing page live)
- Still overwhelmingly India-first in customer base and published case studies

Competitive Landscape

- Compares itself to Shopify, BigCommerce, PrestaShop, and smaller RTO-specific tools (Kriya, NearPe)
- Differentiates on RTO-specific AI/ML rather than being a general commerce platform

Proof Points

- Iconic: 67% increase in checkout conversion, 77% reduction in RTO rate
- AdilQadri: 66.6% increase in checkout conversion via UPI incentive design
- Aggregate claim of 35-40%+ checkout conversion improvement across its brand base (per G2)

Recent Developments

- Continues to publish festive-season data (Tier 2/3 town order share, COD-to-prepaid mix shift) — a useful recurring, dated data source, but check the year before treating any single stat as current

Leadsquared

Flagship | SaaS — Sales CRM & Marketing Automation

Snapshot

- Founded 2011-2013 (sources vary slightly) by Nilesh Patel (CEO), Prashant Singh (COO), Sudhakar Gorti; HQ Bengaluru, India
- ~$153M total raised (Series C, June 2022); reported to be in talks for a further $100M at a $1B valuation in 2022 — unicorn status not independently confirmed
- Note: one data source (Tracxn) shows conflicting/unreliable funding figures for this company — treat Crunchbase/press figures as more reliable than aggregator sites here

What They Sell

- Unified CRM + marketing automation ('sales execution platform'): lead management, sales pipeline, mobile/field-force CRM
- Vertical-specific CRM builds for EdTech, financial services/insurance, healthcare, and real estate

Revenue Model & Motion

- Subscription/per-user pricing, starting around $25/user/month
- Motion: sales-led for mid-market and enterprise; positions as a vertical SaaS specialist rather than a horizontal CRM

Who Buys It

- Sales and marketing operations leaders across education, financial services/insurance, healthcare, and high-velocity sales organizations

Geographies

- India-origin (Bengaluru) with a San Francisco presence; serves both B2B and B2C businesses across India and internationally

Competitive Landscape

- Salesforce, HubSpot, Zoho, Freshworks, Capillary Technologies
- Differentiates via vertical depth (EdTech, financial services, healthcare) versus horizontal platforms

Proof Points

- Built to handle thousands of users and millions of leads per deployment (per Growjo)
- Used across both enterprise and SMB customer bases

Recent Developments

- No major 2026 funding or product news surfaced in this pass — flag as a gap if currency matters for the case

Sprinto

Single-purpose | Cybersecurity — Compliance Automation

Snapshot

- Founded 2020 by Girish Redekar and Raghuveer Kancherla; HQ Bengaluru, India
- Series B, $20M (April 2024, led by Accel); ~$31.8-32.2M total raised

What They Sell

- Compliance automation platform for SOC 2, ISO 27001, GDPR, HIPAA, PCI-DSS and 200+ other frameworks
- Continuous control monitoring, automated evidence collection, audit-readiness dashboard, Trust Centre

Revenue Model & Motion

- No public pricing, no self-serve tier, no free trial — every deal is a custom quote
- No seat-based pricing or paid add-ons — single bundled quote covering the full program
- Typical annual spend in the mid five-figures (published reference: a 'Starter' plan at ~$15,000/year; real quotes range roughly $6,000-$20,000)
- Motion: content-led/PLG-adjacent marketing funnel, but a sales-assisted, high-touch close — not self-serve

Who Buys It

- Security/compliance leads and founders/CTOs at cloud-native startups facing enterprise-buyer security requirements

Geographies

- India-headquartered; 3,000+ customers across 75 countries as of 2026 — genuinely global customer base despite India HQ

Competitive Landscape

- Vanta (market share leader), Drata, Secureframe, Tugboat Logic
- Positions on price-competitiveness and multi-framework breadth rather than integration depth

Proof Points

- 1,000+ customers; FY24 revenue $6.3M, up from $2.5M in FY23 (2.5x YoY)
- G2 rating 4.6-4.8/5 across ~1,300 reviews

Recent Developments

- Launched 'Sprinto AI' (2025), expanded into an 'Autonomous Trust Platform' (March 2026)

WebEngage

Single-purpose | Martech — Ecommerce Marketing Automation

Snapshot

- Founding year/founders not independently verified in this pass — flag as a gap before publishing
- India-origin (Mumbai/Bengaluru); part of the 'Indian-origin trio' alongside CleverTap and MoEngage

What They Sell

- Customer engagement platform: omnichannel messaging across email, SMS, push, WhatsApp, in-app, and web
- Journey orchestration with a built-in Customer Data Platform (CDP) as core architecture, not a bolt-on

Revenue Model & Motion

- Custom, MAU (monthly active user)-based pricing — typically $25,000-$70,000 annually for mid-market
- No fully public pricing; motion is sales-led and quote-based

Who Buys It

- Marketing, growth, and product teams at consumer apps and D2C/ecommerce brands

Geographies

- Strong presence in India, Southeast Asia, and the Middle East — APAC-centric versus more US/enterprise-leaning rivals

Competitive Landscape

- CleverTap (analytics-forward), MoEngage (APAC + WhatsApp strength), Braze (enterprise-scale, 2-3x cost), Insider, Customer.io
- One comparison source estimates WebEngage runs 15-20% cheaper than MoEngage for similar features

Proof Points

- Categorized as a CDP on G2 (a distinct architectural claim versus CleverTap)
- Consistently praised across sources for onboarding/support quality

Recent Developments

- No major 2026-specific news surfaced in this pass — category is in active, ongoing competitive flux across all three Indian-origin players

Procol

Single-purpose | SaaS — Procurement & E-sourcing

Snapshot

- Founded 2018 (one source) / 2022 (another) by Gaurav Baheti (ex-Google NY, Zomato) and Sumit Mendiratta (ex-OYO, Zomato) — founding-year discrepancy across sources, flag before publishing
- Dual presence New York + India; Series A, $11.2-17.1M total raised from GMO Venture Partners, Blume Ventures, Peak XV/Sequoia Surge, Beenext

What They Sell

- AI-native procurement / source-to-pay platform: e-auctions, strategic sourcing, vendor onboarding, spend analytics, procure-to-pay, supplier management

Revenue Model & Motion

- Enterprise SaaS, sales-led, long procurement sales cycle — typical of enterprise software sold into finance/ops functions
- Serves manufacturing, construction, and IT/services sectors specifically

Who Buys It

- Procurement teams, finance teams, and supply chain managers at enterprises
- 200+ enterprise clients, including some $100M+ revenue companies

Geographies

- Started India-focused (built around India's $500B procurement market); now explicitly positions toward the global 'trillion-dollar enterprise procurement market' with a US HQ presence

Competitive Landscape

- Taulia, Zip, Vayana (per Tracxn); broader category incumbents include SAP Ariba and Coupa

Proof Points

- Early claim: grew managed spend from ₹70 Cr to ₹7,000 Cr in 2 years
- Claims procurement cost reductions of up to 10%; recent marquee customer win: Gopal Snacks

Recent Developments

- Launched new AI agents (2026); recognized as a 'Vanguard Procurement Platform'; sponsoring US industry events (DPW New York)

Vyapar

Single-purpose | SaaS — SMB Billing & Accounting

Snapshot

- Founded 2016 (Simply Vyapar Apps); HQ Bengaluru, India
- No major VC funding surfaced in this pass — appears bootstrapped/self-sustaining, a sharp contrast to every other company on this list

What They Sell

- GST-compliant billing, invoicing, inventory, and accounting app (mobile + desktop), works fully offline

Revenue Model & Motion

- Freemium / product-led growth: free mobile plan plus paid premium tiers for desktop and advanced features
- No sales team required for the large majority of buyers — the purest self-serve motion on this list

Who Buys It

- Individual small business owners: retailers, wholesalers, manufacturers, distributors, freelancers, service providers, pharmacies, grocers
- Explicitly non-technical buyers with no accounting background assumed

Geographies

- India-first, MSME-focused — 93% of reviewers are small businesses (per Capterra)

Competitive Landscape

- Tally (legacy incumbent), Busy, MyBillBook
- Positions as the more mobile-friendly, modern alternative to Tally

Proof Points

- 1M+ small businesses using the software (per Crunchbase)
- 87% aggregate user satisfaction rating (SelectHub)

Recent Developments

- Rides the broader India MSME-digitization tailwind rather than any single recent event

MoveInSync

Single-purpose | Mobility — Fleet & EV Digital Platform

Snapshot

- Founded 2009 by Deepesh Agarwal, Akash Maheshwari, Anuvrata Arora (IIT-BHU alumni); HQ Bengaluru, India
- Series C; total raised figures vary by source ($31.9M per Tracxn vs. up to $116M per other trackers); most recent raise $15M (Jan 2024)

What They Sell

- MoveInSync Ion: SaaS for employee commute automation (routing, real-time tracking, automated billing, ESG/safety compliance)
- MoveInSync One: managed 'Transport as a Service' — owns/operates a fleet of 5,200+ vehicles including 500+ EVs
- Also offers parking management for facility admins

Revenue Model & Motion

- Hybrid model: SaaS platform subscription plus managed transport-operations service fees — an asset-heavy layer on top of pure software
- Motion: enterprise sales-led

Who Buys It

- Facilities/admin, HR, and increasingly ESG/sustainability leads at large enterprises
- Buying argument centers on safety and cost, not just convenience

Geographies

- India-headquartered, India-first customer base, presence across 20+ Indian cities
- Markets itself as the 'world's largest employee commute platform' with 72 Fortune 500 clients

Competitive Landscape

- Routematic, Lithium Urban Technologies, Volercars (India-focused peers)
- Swvl (Dubai-based) as a different-geography comparator

Proof Points

- 300+ clients including 72 Fortune 500 companies (Google, Microsoft, Adobe, Oracle, Wipro cited)
- 450,000+ monthly active users, 2.5M+ monthly trips
- Claims 15-30% cost savings and up to 80% reduction in manual intervention

Recent Developments

- Revenue figures vary widely across sources ($47M, $74.6M, $154.1M cited in different places) — treat any single figure as directional, not precise
- Reported (per a 2023 TechCrunch piece) to be targeting IPO-readiness within 2-3 years

TrueFoundry

Single-purpose | AI/ML — ML Deployment Platform

Snapshot

- Founded ~2022 by Nikunj Bajaj (CEO) and Abhishek Choudhary (CTO), both ex-Meta engineers
- Dual HQ San Francisco + India; Series A, $19M (Feb 2025, led by Intel Capital); ~$21M total raised

What They Sell

- Enterprise Platform-as-a-Service (PaaS) for deploying and managing AI/ML and LLM/agentic applications
- Kubernetes-native architecture; AI Gateway, MCP Gateway, and Agent Gateway for governing access to Gen AI components; model deployment and observability tooling

Revenue Model & Motion

- Enterprise PaaS subscription, pricing not disclosed (likely usage/infrastructure-scale based)
- Motion: technical/developer-first product entry point with a bottom-up technical champion, closed top-down as an enterprise deal — hybrid PLG-to-enterprise, typical of infrastructure tooling

Who Buys It

- AI/ML engineering leads, platform engineering teams, and CTOs running production ML/LLM workloads

Geographies

- US + India dual presence; enterprise customer base includes several Fortune 500 companies

Competitive Landscape

- Broader MLOps/LLMOps category; differentiates via self-hostable, Kubernetes-native architecture and data-sovereignty positioning (on-prem/air-gapped deployment options)
- Named competitors not surfaced in this pass — flag as inferred category positioning, not sourced

Proof Points

- 4X year-over-year customer base growth (as of Feb 2025); 1,000+ clusters deployed
- Customers include Siemens Healthineers, ResMed, Automation Anywhere, Games 24x7, NVIDIA
- Claims 80% faster time-to-production, 35% cloud cost savings, 10X faster business value

Recent Developments

- Actively building out an 'AI manages AI' agentic vision and AI/MCP Gateway products in 2026 — a fast-moving, very current roadmap

IDfy

Single-purpose | AI/ML — KYC & Identity Verification

Snapshot

- Founded 2011-2012 (sources vary) by Ashok Hariharan and Vineet Jawa; legal entity Baldor Technologies Pvt Ltd; HQ Mumbai, India
- Raised ₹86 Cr in a Series D (Blume Ventures, TransUnion) plus a further $27M round — total raised not cleanly disclosed as one figure across sources

What They Sell

- Individual KYC: Aadhaar, PAN, driving licence, voter ID verification with face match; video KYC
- Background verification: employment history, criminal records, education credentials
- Business KYC/KYB: GST verification, MCA filings, director ID, UBO checks for merchant onboarding and B2B lending

Revenue Model & Motion

- Per-verification / per-consent-event / per-dataset pricing — from roughly ₹1,000 for simple checks up to lakhs for complex enterprise risk assessments
- A usage-based/transactional model layered under enterprise contracts
- Motion: enterprise sales-led, more high-touch than category peer HyperVerge, which leans more self-serve

Who Buys It

- BFSI compliance/risk officers, HR/background-check buyers, e-commerce and gig-platform trust & safety teams

Geographies

- India, Southeast Asia, Middle East
- Scale figures vary by source and year: 60M+ verifications/month for 1,500+ clients (2023-era figure) vs. 600+ enterprise clients cited in a 2026 source — likely different counting methodology, flag rather than reconcile

Competitive Landscape

- Perfios, Signzy, HyperVerge — direct India KYC/verification peers

Proof Points

- India's identity verification market itself is projected to grow from $451M (2024) to $1.72B (2033) at 16% CAGR — useful market-sizing context
- Has built in-house LLMs positioned as 'copilots for underwriters'

Recent Developments

- Testing a new 'transaction intelligence' product (beta, 2025) using bank-statement analysis for credit decisions
- Positions Southeast Asia, Africa, and the Middle East as next expansion markets given similar digitization stage to India

Squadstack

Single-purpose | Sales Tech — AI + Human Telecalling

Snapshot

- Founded 2014-2015, originally as 'SquadRun'; founders include Apurv Agrawal, Kanika Jain, Vikas Gulati, and Rishabh Ladha
- HQ Noida, India; Series B, $24.9M total raised from Bertelsmann India Investments, Blume Ventures, Alteria Capital, Chiratae Ventures

What They Sell

- 'Humanoid AI Agent': voice AI conducting natural, empathetic conversations for sales and support calls
- A managed marketplace of on-demand and dedicated human telecallers, with agent-assist tooling (script adherence, quality monitoring, real-time coaching)

Revenue Model & Motion

- Variable/success-linked pricing tied to call efficiency and outcomes — explicitly not flat BPO seat pricing
- Two tiers: on-demand part-time callers (simple, scripted, elastic demand) vs. dedicated callers (complex, high-context sales use cases)
- Motion: sales-led, hybrid services+SaaS B2B model

Who Buys It

- Consumer businesses selling high-ticket products/services needing outbound/inbound calling at scale: financial services, e-commerce, edtech, healthcare, real estate/brokerage

Geographies

- India-first (Noida HQ), built for the 'Bharat' telecalling market
- AI trained on 600M+ real conversations across 10+ Indian languages and dialects, including code-mixing

Competitive Landscape

- Observe.AI, Poly, Gradient Labs (per Tracxn)
- Positions primarily against traditional BPO/call-center providers as the model it's disrupting

Proof Points

- Processed 1B+ customer interactions to date
- Claims a 1:53 leverage ratio (one ops person overseeing many agents) versus traditional BPO structures
- ZestMoney case: processed 63 lakh+ leads within a few months

Recent Developments

- Won 'Best Contact Centre of the Year' (2024, Digital CX Confex Awards)
- Actively repositioning around the 'Humanoid AI Agent' product as voice AI matures

Xoxoday

Single-purpose | SaaS — Rewards & Engagement Platform

Snapshot

- Founded 2012 by Manoj Agarwal, Sumit Khandelwal, Abhishek Kumar, and Kushal Agrawal (some sources also list Abhimanyu Choudhary); HQ Bengaluru, India
- Series C; $101M total raised from Mahindra, Giift, Apis Partners and others

What They Sell

- Empuls: employee engagement, recognition, surveys, internal communication
- Compass: sales incentive and commission management software
- Loyalife / Plum: customer loyalty, rewards, and gifting — a global catalog of 10M+ redemption options across 175+ countries
- NOTE: this 'Plum' rewards product is unrelated to the separate insurtech company 'Plum' (PlumHQ) elsewhere on this list — same name, different company, worth flagging to students explicitly

Revenue Model & Motion

- Subscription-based recurring platform fee
- Motion: hybrid — self-served for smaller/simpler use cases (per customer testimonials) alongside enterprise sales-led deals for large accounts (Infosys, HCL, SAP SuccessFactors, Siemens cited as clients)

Who Buys It

- HR/people teams (employee engagement), sales ops leaders (commission/incentive management), marketing/growth teams (customer loyalty and referral programs)

Geographies

- India-origin (Bengaluru), now global — rewards delivered across 175+ countries and currencies

Competitive Landscape

- Zaggle, Medallia, Sodexo (per Tracxn)

Proof Points

- Xero client case: 25% conversion lift via automated referral rewards
- Historically claimed ~100% YoY revenue growth in an earlier growth phase
- Targets roughly 1% share of the $300B global rewards & recognition market

Recent Developments

- Consolidating around three flagship product lines (Empuls, Compass, Loyalife) with an 'AI co-pilot' layered across all three as of 2026

Plum (PlumHQ)

Single-purpose | Insurtech — SME Employee Healthcare

Snapshot

- Founded 2019 by Abhishek Poddar (ex-Google, McKinsey) and co-founders; HQ Bengaluru, India
- ~$41.2M total raised, including a $20.5M round (March 2026) and an earlier $15.6M Tiger Global-led Series A
- NOTE: distinct from 'Xoxoday Plum,' an unrelated rewards/gifting product — same name, different company

What They Sell

- Digital group health insurance and employee benefits platform for businesses: group health, personal accident, term life insurance, telehealth, claims management
- Operates as a broker/platform working with multiple IRDAI-licensed insurers as underwriting partners — Plum itself is not the insurer

Revenue Model & Motion

- Commission/brokerage-based economics (standard for an insurance broker), wrapped in a SaaS-like digital UX
- Differentiator: monthly premium payment option, versus the industry-standard annual upfront payment
- Onboarding claimed to take under an hour — a fast, low-touch sales motion for a category that's traditionally high-friction

Who Buys It

- HR/people leaders at startups and SMEs (minimum group size ~7 employees)
- Increasingly also India entities of global/multinational teams

Geographies

- India-first; explicitly expanding to serve global teams needing India-specific benefits administration

Competitive Landscape

- Onsurity (most direct, most-cited rival), Loop Health, Nova Benefits, SecureNow, Pazcare, Digit, HDFC ERGO, Riskcovry

Proof Points

- Client quote: claims settle within a week versus 6+ months for reimbursement elsewhere; cashless discharge sometimes in ~20 minutes
- Premiums cited in the ₹6,000-₹12,000 per employee range

Recent Developments

- Continued fundraising into 2026 even as the SME group-health category has become more crowded and competitive

Onsurity

Single-purpose | Insurtech - SME Employee Healthcare

Snapshot

- Founded 2020 by Yogesh Agarwal, Kulin Shah and co-founders; HQ Bengaluru, India
- Series B; ~$45M total raised, including a $21M round led by Creaegis, and earlier seed funding from Nexus Venture Partners

What They Sell

- Employee healthcare/wellness benefits platform for SMEs: hospitalization coverage, healthcare-at-home services, pre/post-hospitalization expense cover
- 'Onsurity Plus': a suite of business risk insurance products
- Explicitly designed to cover flexible workforces — on-role, off-role, contractual, and freelance employees together

Revenue Model & Motion

- Subscription-style monthly plans rather than traditional annual insurance premiums — flexibility is the core marketed differentiator
- Motion: sales-assisted SME acquisition

Who Buys It

- HR leaders and founders at SMEs, especially those with mixed workforce composition (gig/contract workers alongside full-time employees)

Geographies

- India — onboarded 8,000+ companies across 26 states and 3 union territories; targeting 50,000 companies by 2026

Competitive Landscape

- Plum (most direct rival), Acko, Loop Health

Proof Points

- 8,000+ companies onboarded; clients cited include MyGlamm, Magicpin, Bombay Locale, DBS, Naturals
- Former cricketer Anil Kumble is an investor and strategic advisor — a notable brand-credibility signal in India

Recent Developments

- Continued Series B-stage fundraising (2024-2025) to fund expansion of the 'Onsurity Plus' business-risk product line

Zenskar

Single-purpose | SaaS — Usage-based Billing & Revenue Automation

Snapshot

- Founding year not clearly disclosed (likely 2021-2022); co-founded by Apurv Bansal (CEO) and co-founder(s)
- Dual HQ New York + India; Series A, $15M (April 2026, led by Susquehanna Venture Capital, Bessemer Venture Partners, Shine Capital, Rho)

What They Sell

- AI-native billing and revenue automation ('Quote-to-Cash') platform for complex B2B pricing
- Handles usage-based billing, prepaid credits, multi-entity and multi-currency structures, automated revenue recognition (ASC 606), and AI agents for order-to-cash workflows ('Agents Marketplace')

Revenue Model & Motion

- SaaS subscription, likely priced on billed-revenue volume or usage tiers — exact pricing not disclosed
- Motion: content/webinar-led awareness (PLG-adjacent), but ultimately a finance-team enterprise sale requiring real integration work

Who Buys It

- CFOs and finance/RevOps leaders at B2B SaaS companies with usage-based or hybrid pricing models — a technical/finance buyer persona, distinct from a growth/ops buyer

Geographies

- US (New York HQ) + India; customer base described as 'modern B2B' companies broadly, not India-specific

Competitive Landscape

- Positions against legacy order-to-cash systems broadly — likely incumbents such as Zuora, Chargebee, or Maxio-type players, though none were named directly in sourced material; treat this as inferred category positioning, not a sourced claim

Proof Points

- 100ms (video infrastructure startup) case: adopted Zenskar to automate usage-based billing
- Sardine case: replaced four years of in-house billing infrastructure with Zenskar

Recent Developments

- April 2026 Series A explicitly framed around expanding 'agentic' AI capabilities and a 'zero-touch finance' vision — a very current story that connects directly to the AI-for-sales/finance elective you're building
