Level 5 Business Question: Four Practice Papers

The 4-step approach used for every company

1. Break it down	Split the big question into small ones	A: where are we doing well? B: where are we losing money or people by our own mistakes?
2. Find the columns, make guesses	Pick the columns we need, then write 3 guesses (hypotheses)	What data do we need, and what do we think we will find?
3. Test with data	Check each guess with numbers from the sheet	Tables and charts with real figures
4. Conclude	Answer the question from what the data said	What is healthy, what leaks, and where the money should go

1. LearnLoop

The question: LearnLoop must decide where to put next quarter's money: course categories, instructors, channels, coupons or the support team. Where is it healthy, where is it losing money or learners, and what should we do?

"Lost" means learners whose course is Dropped or Refunded (they started, then left). **"Completed %"** means the share of all enrolments that are completed.

A. Where are we doing well and growing?	Places that bring in good money *and* keep their learners. Put more money here.	Enrolments, money collected, completed %
B. Where are we losing money or learners by our own mistakes?	Places where we give money away (discounts), give money back (refunds), lose people halfway, or let them down with slow help.	Discounts, refunded %, dropped %, how long tickets wait

We then check the five choices leadership gave us: **course categories**, **instructors**, **channels** (the ways people find us), **coupons** and the **support team**.

We join the sheets using the ID that they share:

Enrollment	Courses	Course ID	category, level and price of each purchase
Courses	Instructors	Instructor ID	who teaches each course
Enrollment	Learners	Learner ID	how each learner found us
Support Tickets	Enrollment	Enrollment ID	which purchases had a complaint

The columns we need:

Growth	Enrollment Timestamp, Amount Paid, Category, Instructor Name	Enrolments and money, month by month
Staying or leaving	Status, Completion %	Completed %, Dropped %, Refunded %
Money given away	Coupon Code, List Price, Amount Paid	Discount = List Price − Amount Paid
Instructors	Instructor Name, Avg Rating	Do high-rated instructors keep more learners?
Channels	Acquisition Channel, Signup Date	Signups who buy, Completed %, Lost %
Support	Created At, Resolved At, Priority, CSAT Rating	Hours to fix, happiness score, Lost % with a ticket

Our 3 guesses (hypotheses):

Guess 1: Every category is growing, but a few instructors and courses lose learners. **Guess 2:** Coupons give away a lot of money without bringing better learners. The channels are all about the same.

Guess 3: Learners who have problems and wait for help leave more.

Monthly enrolments grew from 32 (Jul 2025) to 371 (Sep 2026). Monthly money grew from ₹1.6 lakh to ₹22.0 lakh.

Guess 1: Everything is growing, but a few instructors and courses lose learners

1a. Course categories

Marketing	582	₹37.2L	₹35.2L	5.2%	12.9%	35.2%	18.0%
Finance	552	₹36.2L	₹34.4L	5.3%	10.9%	40.0%	16.1%
Design	540	₹34.0L	₹32.7L	3.3%	11.5%	40.4%	14.8%
Programming	528	₹29.6L	₹28.5L	3.8%	13.6%	39.2%	17.4%
Data & Analytics	565	₹29.5L	₹28.1L	4.8%	13.8%	37.9%	18.6%
Business	526	₹26.9L	₹25.8L	3.4%	12.9%	38.2%	16.3%

• All six categories grew 2.9 to 4.4 times (Jul–Sep 2025 vs Jul–Sep 2026).

• Marketing (₹37.2L), Finance (₹36.2L) and Design (₹34.0L) earn the most.

• Categories are close on lost learners (14.8% to 18.6%). So the leak is **not** in the category. It is inside it.

1b. Instructors (most lost learners at the top; red = worst, green = best)

Aman Banerjee	4.7	223	₹8.0L	7.6%	13.9%	35.0%	21.5%
Priya Bhatt	4.1	432	₹22.2L	5.1%	13.2%	35.4%	18.3%
Zoya Chauhan	4.7	126	₹3.8L	3.2%	15.1%	35.7%	18.3%
Pooja Sharma	4.3	148	₹6.0L	3.4%	14.9%	42.6%	18.2%
Preeti Joshi	4.4	150	₹15.0L	5.3%	12.0%	34.7%	17.3%
Karan Shah	4.7	254	₹16.1L	3.5%	13.8%	39.0%	17.3%
Geeta Tiwari	4.1	243	₹17.8L	4.1%	13.2%	38.3%	17.3%
Nikhil Joshi	4.3	254	₹19.9L	4.3%	12.2%	39.0%	16.5%
Fatima Pillai	4.2	220	₹17.2L	4.1%	12.3%	38.6%	16.4%
Tanvi Menon	4.7	270	₹17.7L	5.9%	10.4%	39.6%	16.3%
Harsh Bhatt	3.8	282	₹18.5L	4.6%	11.3%	40.4%	16.0%
Geeta Malhotra	4.3	283	₹9.1L	2.8%	12.7%	38.2%	15.5%
Sunita Pillai	4.3	88	₹5.3L	1.1%	13.6%	42.0%	14.8%
Aman Bose	3.9	320	₹16.8L	2.8%	10.9%	41.6%	13.8%

• **Aman Banerjee** loses the most: 21.5% lost, 7.6% refunds. His course **Data Storytelling** loses 25.0%. • **Priya Bhatt** is our biggest earner (432 enrolments, ₹22.2L) but only 35.4% finish and ₹1.33L was refunded. Fixing her courses is worth the most.

- **Aman Bose** (13.8% lost) and **Harsh Bhatt** (16.0%) keep learners well. **Sunita Pillai** has only 1.1% refunds but few enrolments (88).
- Other weak courses: Python for Data (24.0% lost), Operations Management (23.2%), Email Marketing (22.6%).

Surprise: star ratings do not help. Instructors rated 4.5+ lose **18.2%** of learners. Instructors rated 4.0 or less lose only **14.8%**.

Result: guess 1 is right. Growth is healthy. The trouble sits in a few instructors and courses, and ratings do not show it.

Guess 2: Coupons give away a lot, and the channels are about equal

2a. Coupons

FESTIVE20	20%	1,006	30.5%	₹13.3L	68.2%	16.3%	39.0%
REF15	15%	120	3.6%	₹1.1L	5.6%	14.2%	34.2%
STUDENT25	25%	206	6.3%	₹3.3L	17.0%	19.4%	36.9%
WELCOME10	10%	275	8.4%	₹1.8L	9.1%	19.6%	42.5%
No coupon	0%	1,686	51.2%	–	–	16.7%	38.0%

• Half of all enrolments use a coupon (1,607 of 3,293). Discounts cost **₹19.4 lakh**.

• **FESTIVE20 is 68% of that** (₹13.3L). It runs every month, not only at festivals, and on cheap and costly courses alike.

• FESTIVE20 learners are not better: 39.0% finish and 16.3% are lost, against 38.0% and 16.7% with no coupon. We give up ₹1,319 on each one.

• Other coupons are used correctly (every STUDENT25 user is a student, every REF15 user came by Referral).

We cannot tell how many would have bought at full price anyway. So test first, do not just cut. **2b. Channels (how learners find us)**

Organic Search	345	91.9%	927	₹53.7L	2.69	35.2%	17.6%
Paid Social	302	92.4%	763	₹44.2L	2.53	41.5%	16.6%
Referral	250	92.8%	638	₹37.6L	2.55	36.2%	16.9%
Email Campaign	148	90.5%	355	₹21.3L	2.40	39.7%	16.6%
Influencer	147	89.1%	348	₹20.3L	2.37	43.7%	17.0%
Campus Ambassador	108	95.4%	262	₹16.3L	2.43	37.8%	15.6%

• All channels are healthy: 89% to 95% of signups buy, and lost learners are 15.6% to 17.6%. • Organic Search is biggest (₹53.7L, 28% of money), then Paid Social (₹44.2L).

• Influencer learners finish the most (43.7%) with the fewest refunds (3.7%). Organic Search learners finish the least (35.2%).

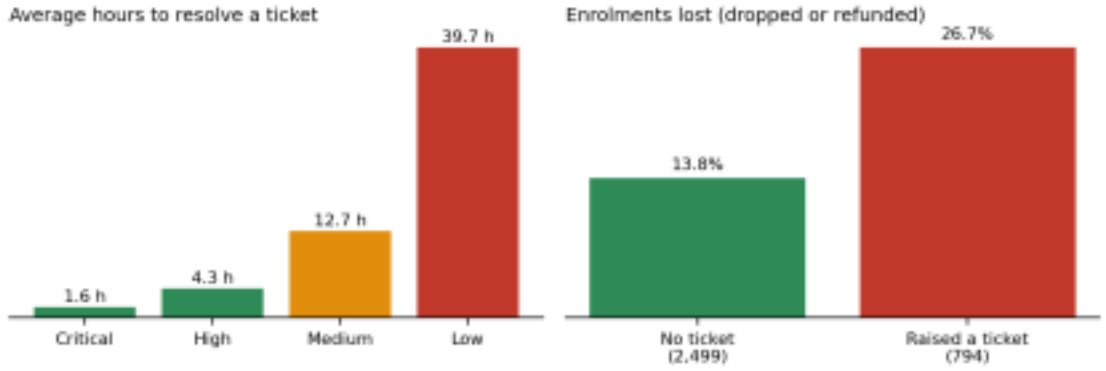

Result: guess 2 is right. FESTIVE20 is the biggest giveaway and brings no better learners. No channel is losing us money.

Guess 3: Learners who need help and wait leave more

No ticket	2,499	2.8%	11.0%	13.8%	40.8%
1 ticket	660	7.7%	16.5%	24.2%	32.6%
2 tickets	114	12.3%	22.8%	35.1%	27.2%
3 or more tickets	20	40.0%	20.0%	60.0%	5.0%
Any ticket	794	9.2%	17.5%	26.7%	31.1%

• **24 out of every 100 enrolments have a ticket.** These learners are lost **1.9 times as often** (26.7% vs 13.8%). The more tickets, the worse it gets: 24% lost with 1 ticket, 35% with 2, 60% with 3 or more.

• Refund requests explain part of it (51% of those were lost). But even learners with *other* problems leave more: 17.9% dropped vs 11.0% with no ticket.

Critical	71	1.6 hours	0.0%	4.2
High	208	4.3 hours	0.0%	3.8
Medium	371	12.7 hours	0.0%	3.9
Low	300	39.7 hours	74.1%	3.3

• Critical, High and Medium tickets are fixed fast (all within a day). **Low-priority tickets are the problem:** 40 hours on average, and 74% wait over a day. That is 300 tickets (32% of all).

Under 4 hours	196	4.13	13 of 153 (8%)
4 to 12 hours	270	3.75	31 of 198 (16%)
12 to 24 hours	228	3.93	19 of 169 (11%)

24 to 48 hours	105	3.00	28 of 81 (35%)
Over 48 hours	101	2.89	31 of 73 (42%)

• **Waiting makes learners unhappy.** The happiness score drops from 4.1 to about 2.9 after a day. 42% of those who waited over 48 hours gave 1 or 2 stars (vs 8% when fixed in under 4 hours). • **Waiting also costs us learners.** If the ticket took over 24 hours, 31% were lost, vs 25% if it was fixed within a day. 50 tickets are still open.

• **It is not about one agent.** Shreya Patel looks slowest, but 42% of their tickets are Low priority (usual: 32%). The wait comes from the Low-priority line, not the person.

• **Fix the cause too:** Technical Glitch (219) and Content Access (189) are 43% of all tickets. **Result:**

guess 3 is right. Support is the biggest hidden leak.

What is healthy: All six categories and channels grow and keep most learners. Critical, High and Medium tickets are fixed fast.

What is leaking: Slow support for Low-priority tickets, the FESTIVE20 coupon, and a few instructors and courses. In total, **557 enrolments** (17%) were lost. Those learners had paid ₹32.9L.

Where to put the money (in order)

1	**Support** (first)	Fix Low-priority tickets within 24 hours. Clear the 50 open tickets. For refund requests, offer help first. Fix glitches and access bugs.	Learners with tickets are lost 26.7% vs 13.8%. Low tickets take 39.7 hours. Happiness falls from 4.1 to 2.9 after a day.
2	**Coupons**	Stop FESTIVE20 all year. Keep it for real festival weeks or first-time buyers. Test by switching it off for a few weeks in one city.	It costs ₹13.3L (68% of discounts) and brings no better learners.
3	**Instructors and courses**	Review Data Storytelling, Python for Data, Operations Management and Email Marketing. Coach Aman Banerjee and Priya Bhatt on keeping learners. Copy Aman Bose and Harsh Bhatt.	These courses lose 22% to 25% of learners. Ratings do not warn us.
4	**Growth**	Back Finance and Design. Promote Aman Bose, Harsh Bhatt, Nikhil Joshi and Sunita Pillai.	Finance ₹36.2L and Design ₹34.0L, with 16.1% and 14.8% lost.
5	**Channels**	Keep all. Lean towards Influencer and Paid Social. Ask finance for the cost of each channel.	Influencer learners finish 43.7%, Paid Social 41.5%, Organic Search 35.2%.

Keep in mind: the data shows links, not proof. None of the sheets has cost data, so we cannot work out return per rupee. Newer enrolments are still going on, so their finish rates will rise.

2. FitPulse

The question: FitPulse must decide where to put next quarter's money: program categories, coaches, channels, coupons or the support team. Where is it healthy, where is it losing money or members, and what should we do?

"Lost" means members whose program is Dropped or Refunded (they started, then left). **"Completed %"** means the share of all enrolments that are completed.

A. Where are we doing well and growing?	Places that bring in good money *and* keep their members. Put more money here.	Enrolments, money collected, completed %
B. Where are we losing money or members by our own mistakes?	Places where we give money away (discounts), give money back (refunds), lose people halfway, or let them down with slow help.	Discounts, refunded %, dropped %, how long tickets wait

We then check the five choices leadership gave us: **program categories**, **coaches**, **channels** (the ways people find us), **coupons** and the **support team**.

We join the sheets using the ID that they share:

Enrollments	Members	Member ID	how each member found us
Enrollments	Programs	Program ID	category, level and price of each purchase
Programs	Coaches	Coach ID	who leads each program
Support Tickets	Enrollments	Enrollment ID	which purchases had a complaint

The columns we need:

Growth	Enrollment Timestamp, Amount Paid, Category, Coach Name	Enrolments and money, month by month
Staying or leaving	Status, Progress %	Completed %, Dropped %, Refunded %
Money given away	Coupon Code, List Price, Amount Paid	Discount = List Price − Amount Paid
Coaches	Coach Name, Avg Rating	Do high-rated coaches keep more members?
Channels	Acquisition Channel, Signup Date	Signups who buy, Completed %, Lost %
Support	Created At, Resolved At, Priority, CSAT Rating	Hours to fix, happiness score, Lost % with a ticket

Our 3 guesses (hypotheses):

Guess 1: Every category grows evenly, but a few coaches and programs lose members. **Guess 2:** Coupons give away a lot without bringing better members, and one channel brings weaker members.

Guess 3: Members who have problems and wait for help leave more.

Monthly enrolments grew from 29 (Jul 2025) to 387 (Sep 2026). Monthly money grew from ₹0.9 lakh to ₹11.3 lakh.

Guess 1: Categories grow evenly, but a few coaches and programs lose members

1a. Program categories

Yoga	539	₹17.6L	₹16.6L	5.0%	13.5%	37.5%	18.6%
Dance Fitness	551	₹16.2L	₹15.2L	5.4%	9.6%	36.1%	15.1%
Cardio & HIIT	547	₹16.2L	₹15.4L	5.5%	11.3%	38.6%	16.8%
Strength Training	573	₹16.1L	₹15.4L	4.0%	11.0%	35.6%	15.0%
Mindfulness	550	₹15.8L	₹15.0L	5.3%	11.3%	34.5%	16.5%
Nutrition	535	₹15.6L	₹14.9L	4.1%	11.8%	38.3%	15.9%

- All six categories grew 3.7 to 5.5 times. Dance Fitness grew fastest.
- Money is very even: Yoga ₹17.6L at the top, Nutrition ₹15.6L at the bottom.
- Yoga loses the most members (18.6%, with 13.5% dropping out). Strength Training loses the fewest (15.0%). The big leak is not the category.

1b. Coaches (most lost members at the top; red = worst, green = best)

Manoj Shah	4.5	120	₹7.8L	5.8%	15.0%	39.2%	20.8%
Aarav Banerjee	4.3	78	₹2.4L	3.8%	16.7%	41.0%	20.5%
Priya Kulkarni	4.7	213	₹4.8L	5.2%	13.1%	41.3%	18.3%
Preeti Sharma	3.8	277	₹7.1L	4.0%	13.7%	35.4%	17.7%
Fatima Yadav	4.6	349	₹7.3L	6.6%	10.9%	40.4%	17.5%
Ishita Sharma	3.9	206	₹5.0L	4.4%	13.1%	32.5%	17.5%
Shreya Nair	4.4	261	₹8.5L	5.0%	11.9%	36.4%	16.9%
Ramesh Singh	4.2	289	₹7.3L	5.5%	10.7%	32.9%	16.3%
Kavya Pillai	4.3	198	₹8.9L	3.5%	12.1%	35.4%	15.7%
Manoj Sharma	4.0	207	₹4.9L	5.3%	10.1%	37.7%	15.5%
Karan Chauhan	4.5	344	₹11.3L	5.5%	9.3%	35.2%	14.8%
Manish Chauhan	4.3	332	₹12.2L	3.9%	10.5%	33.4%	14.5%
Fatima Reddy	3.9	258	₹8.5L	4.3%	9.7%	41.5%	14.0%
Vikram Gupta	4.8	163	₹1.6L	4.3%	9.2%	37.4%	13.5%

• **Manoj Shah** leads our priciest programs (₹7.8L from just 120 enrolments) but loses 20.8% of members. His **Yin & Restorative** loses 26.2%. **Aarav Banerjee** loses 20.5%.

• **Bhangra Burn** (Karan Chauhan) loses 25.4% and only 27.1% finish. Other weak programs: Breathwork Essentials (25.3%), Fat Burn Cardio (23.5%), Weight Loss Nutrition (22.0%). • **Vikram Gupta** (13.5% lost) and **Fatima Reddy** (14.0% lost, 41.5% finish) keep members well.

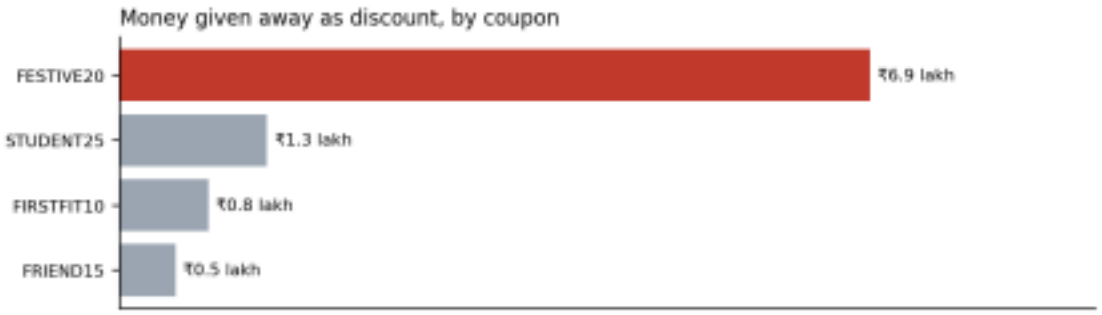

Surprise: star ratings tell us almost nothing. Coaches rated above 4.4 lose **16.7%**. Coaches rated 4.0 or less lose **16.1%**. Fatima Reddy (rated 3.9) is one of our best.

Result: guess 1 is right. Growth is healthy. The trouble sits in a few coaches and programs, and ratings do not show it.

Guess 2: Coupons give away a lot, and one channel is weak

2a. Coupons

FESTIVE20	20%	1,063	32.3%	₹6.9L	72.0%	16.2%	37.0%
FIRSTFIT10	10%	253	7.7%	₹81K	8.5%	18.6%	42.3%
FRIEND15	15%	105	3.2%	₹51K	5.3%	17.1%	34.3%
STUDENT25	25%	177	5.4%	₹1.3L	14.1%	18.6%	32.2%
No coupon	0%	1,697	51.5%	–	–	15.7%	36.4%

• Half of all enrolments use a coupon (1,598 of 3,295). Discounts cost **₹9.5 lakh**.

• **FESTIVE20 is 72% of that** (₹6.9L). It runs every month, on cheap and costly programs alike. • FESTIVE20 members are not better: 37.0% finish and 16.2% are lost, against 36.4% and 15.7% with no coupon. We give up ₹646 on each one.

• STUDENT25 members finish the least (32.2%). Other coupons are used correctly. We cannot tell how many would have bought at full price anyway. So test first, do not just cut. **2b. Channels (how members find us)**

Organic Search	322	95.3%	845	₹24.8L	2.62	39.1%	17.3%
Paid Social	313	91.1%	765	₹22.6L	2.44	35.4%	16.5%
Referral	251	92.8%	639	₹18.9L	2.55	37.7%	14.6%
Influencer	154	94.8%	419	₹12.7L	2.72	37.2%	16.5%
Email Campaign	165	85.5%	375	₹11.1L	2.27	32.5%	16.5%
Gym Partnership	95	95.8%	252	₹7.5L	2.65	36.1%	16.3%

• Most channels are fine: 91% to 96% of signups buy. Organic Search is biggest (₹24.8L, 25% of money). • **Email**

Campaign is weak. Only 85.5% of its signups buy (others 91%+), it has the most refunds (6.7%) and the lowest finish rate (32.5%).

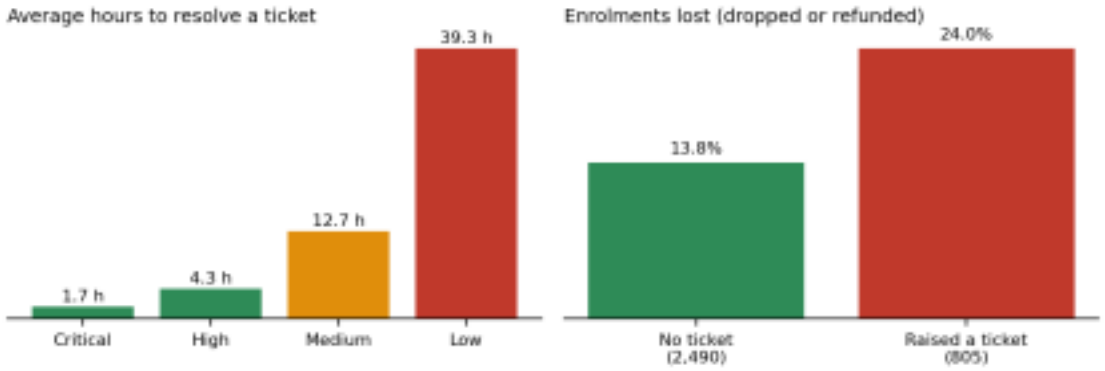

- Gym Partnership signups buy most often (95.8%). Referral loses the fewest members (14.6%).

Result: guess 2 is right. FESTIVE20 is the biggest giveaway and brings no better members. Email Campaign is the channel to fix.

Guess 3: Members who need help and wait leave more

No ticket	2,490	3.5%	10.3%	13.8%	39.0%
1 ticket	679	6.6%	15.0%	21.6%	32.0%
2 tickets	111	20.7%	12.6%	33.3%	18.0%
3 or more tickets	15	40.0%	20.0%	60.0%	13.3%
Any ticket	805	9.2%	14.8%	24.0%	29.7%

- **24 out of every 100 enrolments have a ticket.** These members are lost **1.7 times as often** (24.0% vs 13.8%). The more tickets, the worse it gets: 22% lost with 1 ticket, 33% with 2, 60% with 3 or more.
- Refund requests explain part of it (53% of those were lost). But even members with *other* problems leave more: 15.5% dropped vs 10.3% with no ticket.

Critical	70	1.7 hours	0.0%	4.1
High	220	4.3 hours	0.0%	4.0
Medium	380	12.7 hours	0.0%	3.9
Low	280	39.3 hours	74.8%	3.2

- Critical, High and Medium tickets are fixed fast (all within a day). **Low-priority tickets are the problem:** 39 hours on average, and 75% wait over a day. That is 280 tickets (29% of all).

Under 4 hours	208	4.06	13 of 156 (8%)
4 to 12 hours	260	3.87	23 of 198 (12%)

12 to 24 hours	239	4.01	20 of 179 (11%)
24 to 48 hours	100	2.93	38 of 84 (45%)
Over 48 hours	96	2.85	35 of 78 (45%)

• **Waiting makes members unhappy.** The happiness score drops from 4.1 to about 2.8 after a day. 45% of those who waited over 48 hours gave 1 or 2 stars (vs 8% when fixed in under 4 hours). • **Waiting also costs us members.** If the ticket took over 24 hours, 29% were lost, vs 22% if it was fixed within a day. 47 tickets are still open.

• **It is not about one agent.** Agents only range from 16 to 19 hours on average. What sets the wait is the ticket priority, not the person.

• **Fix the cause too:** App Glitch (231) and Workout Access (192) are 45% of all tickets. **Result:**

guess 3 is right. Support is the biggest hidden leak.

What is healthy: All categories grow evenly and most channels work well. Critical, High and Medium tickets are fixed fast.

What is leaking: Slow Low-priority support, the FESTIVE20 coupon, a few coaches and programs, and the Email Campaign channel. In total, **537 enrolments** (16%) were lost. Those members had paid ₹16.7L.

Where to put the money (in order)

1	**Support** (first)	Fix Low-priority tickets within 24 hours. Clear the 47 open tickets. For refund requests, offer help first. Fix app glitches and workout-access bugs.	Members with tickets are lost 24.0% vs 13.8%. Low tickets take 39.3 hours. Lost members rise from 22% to 29% when the wait passes a day.
2	**Coupons**	Stop FESTIVE20 all year. Keep it for real festival weeks or first-time buyers. Test by switching it off for a few weeks in one city.	It costs ₹6.9L (72% of discounts) and brings no better members.

3	**Coaches and programs**	Review Yin & Restorative, Bhangra Burn, Breathwork Essentials, Fat Burn Cardio. Coach Manoj Shah and Aarav Banerjee on keeping members. Copy Fatima Reddy and Vikram Gupta.	These programs lose 22% to 26% of members. Ratings do not warn us.
4	**Channels**	Fix Email Campaign (the signup-to-buy step and the offers). Keep the rest. Ask finance for the cost of each channel.	Email Campaign: 85.5% buy, 6.7% refunds, 32.5% finish.
5	**Growth**	Back Dance Fitness and Strength Training. Fix Yoga drop-outs before pushing Yoga harder.	Dance grew 5.5 times with 15.1% lost. Yoga is biggest but loses most (18.6%).

Keep in mind: the data shows links, not proof. None of the sheets has cost data, so we cannot work out return per rupee. Newer enrolments are still going on, so their finish rates will rise.

3. FreshBox

The question: FreshBox must decide where to put next quarter's money: produce types, farms, channels, coupons or the support team. Where is it healthy, where is it losing money or customers, and what should we do?

"Lost" means customers whose subscription is Cancelled or Refunded (they started, then left). **"Completed %"** means the share of all subscriptions that are completed.

A. Where are we doing well and growing?	Places that bring in good money *and* keep their customers. Put more money here.	Subscriptions, money collected, completed %

B. Where are we losing money or customers by our own mistakes?	Places where we give money away (discounts), give money back (refunds), lose people halfway, or let them down with slow help.	Discounts, refunded %, cancelled %, how long tickets wait

We then check the five choices leadership gave us: **produce types**, **farms**, **channels** (the ways people find us), **coupons** and the **support team**.

We join the sheets using the ID that they share:

Subscriptions	Customers	Customer ID	how each customer found us
Subscriptions	Boxes	Box ID	produce type, size and price of each box
Boxes	Farms	Farm ID	which farm supplies each box
Support Tickets	Subscriptions	Subscription ID	which subscriptions had a complaint

The columns we need:

Growth	Subscription Timestamp, Amount Paid, Produce Type, Farm Name	Subscriptions and money, month by month
Staying or leaving	Status, Deliveries Completed %	Completed %, Cancelled %, Refunded %
Money given away	Coupon Code, List Price, Amount Paid	Discount = List Price − Amount Paid
Farms	Farm Name, Avg Rating	Do high-rated farms lose fewer customers?
Channels	Acquisition Channel, Signup Date	Signups who buy, Completed %, Lost %
Support	Created At, Resolved At, Priority, Issue Category, CSAT Rating	Hours to fix, tickets per 100 subscriptions, Lost % with a ticket

Our 3 guesses (hypotheses):

Guess 1: Every produce type grows, but Dairy & Eggs and a few farms lose customers. **Guess 2:** Coupons give away a lot without bringing better customers, and some channels bring weaker customers.

Guess 3: Customers who have problems and wait for help leave more.

Monthly subscriptions grew from 25 (Jul 2025) to 421 (Sep 2026). Monthly money grew from ₹0.3 lakh to ₹5.4 lakh.

Guess 1: Everything grows, but Dairy & Eggs and a few farms lose customers

1a. Produce types

Vegetables	524	₹6.6L	₹6.2L	5.9%	11.5%	32.8%	17.4%
Fruits	458	₹6.5L	₹6.2L	5.5%	11.6%	38.2%	17.0%
Herbs & Greens	468	₹6.3L	₹6.1L	3.4%	10.7%	38.9%	14.1%
Dairy & Eggs	464	₹6.1L	₹5.8L	3.9%	15.7%	37.9%	19.6%
Grains & Pulses	516	₹6.0L	₹5.7L	4.7%	11.6%	37.2%	16.3%
Millets & Snacks	495	₹5.7L	₹5.3L	6.3%	12.3%	32.3%	18.6%

• All six produce types grew 3.3 to 6.4 times. Vegetables (₹6.6L) and Fruits (₹6.5L) earn the most. • **Dairy & Eggs is the problem.** 15.7% of its customers cancel (others: 10.7% to 12.3%). It has 40.5 tickets per 100 subscriptions (others: 28 to 32). Almost half its tickets (88 of 188) are about missing items or late delivery.

• Herbs & Greens is the healthiest: 14.1% lost and only 3.4% refunds.

1b. Farms (most lost customers at the top; red = worst, green = best)

Haritha Growers	3.9	54	₹1.4L	5.6%	20.4%	35.2%	25.9%
Monsoon Organics	4.5	176	₹2.1L	6.8%	13.6%	28.4%	20.5%
Riverbend Farms	4.5	254	₹3.5L	5.1%	14.2%	38.6%	19.3%
Terra Growers	4.2	389	₹5.4L	5.9%	12.6%	37.0%	18.5%
Prakriti Agro	4.0	318	₹2.9L	5.3%	12.9%	34.0%	18.2%
Lotus Agro	4.9	156	₹1.1L	1.3%	16.7%	37.8%	17.9%
Golden Acre Agro	4.8	319	₹3.5L	6.0%	11.6%	34.5%	17.6%
Harvest Moon Agro	4.4	212	₹2.2L	3.8%	13.2%	35.8%	17.0%
Haritha Farms	4.4	136	₹2.9L	5.1%	11.0%	27.9%	16.2%
Kisan Organics	4.5	304	₹3.8L	5.3%	10.5%	38.2%	15.8%
Harvest Moon Growers	4.8	70	₹85K	10.0%	5.7%	37.1%	15.7%
Riverbend Organics	4.4	110	₹2.5L	2.7%	12.7%	45.5%	15.5%
Kisan Farms	4.8	358	₹3.8L	3.6%	10.1%	36.9%	13.7%
Amrit Agro	4.3	69	₹1.1L	2.9%	5.8%	44.9%	8.7%

- **Haritha Growers** (A2 Milk Subscription) loses 25.9% and **Monsoon Organics** loses 20.5%. **Riverbend Farms** loses 19.3%.
- **Terra Growers** is our biggest farm (₹5.4L) and loses 18.5%, so fixing it is worth the most. • A farm's average can

hide one bad box. Kisan Organics' **Heritage Rice Collection** loses 26.9%, but its Rice Variety Pack loses only 10.4%.

- **Amrit Agro** (8.7% lost) and **Kisan Farms** (13.7% lost, ₹3.8L) keep customers well.

Ratings help only a little. Farms rated 4.0 or less lose more (19.4% vs 16.9%). But Monsoon Organics and Riverbend Farms are rated 4.5 and still lose 20.5% and 19.3%.

Result: guess 1 is right. Growth is healthy. The trouble is Dairy & Eggs delivery and a few farms and boxes.

Guess 2: Coupons give away a lot, and some channels are weak

2a. Coupons

FESTIVE20	20%	959	32.8%	₹2.6L	69.4%	17.5%	34.8%
FIRSTBOX10	10%	225	7.7%	₹33K	8.7%	16.9%	39.1%
REFER15	15%	92	3.1%	₹21K	5.4%	19.6%	34.8%
STUDENT25	25%	183	6.3%	₹63K	16.6%	14.8%	33.9%
No coupon	0%	1,466	50.1%	–	–	17.1%	36.9%

- Half of all subscriptions use a coupon (1,459 of 2,925). Discounts cost **₹3.8 lakh**.

- **FESTIVE20 is 69% of that** (₹2.6L). It runs every month, on cheap and costly boxes alike. • FESTIVE20 customers are not better: 34.8% finish and 17.5% are lost, against 36.9% and 17.1% with no coupon.
- Other coupons are used correctly. STUDENT25 customers are the most loyal (14.8% lost).

We cannot tell how many would have bought at full price anyway. The rupees are small (10% less FESTIVE20 saves about ₹26,000), so treat it as a test.

2b. Channels (how customers find us)

Organic Search	284	93.0%	763	₹9.9L	2.69	35.9%	16.8%
Paid Social	276	89.9%	714	₹8.7L	2.59	35.3%	16.2%
Referral	191	91.6%	475	₹6.3L	2.49	35.6%	18.5%
Influencer	154	91.6%	407	₹5.1L	2.64	35.4%	17.0%
Email Campaign	142	91.5%	326	₹4.1L	2.30	37.1%	20.6%
Society Campaign	103	89.3%	240	₹2.8L	2.33	40.4%	14.2%

• **Email Campaign loses the most customers:** 20.6% lost, 15.0% cancel. **Referral** is next (18.5% lost).

• **Society Campaign brings the best customers:** only 14.2% lost and 40.4% finish. It is our smallest channel (240), so there is room to grow it.

• Organic Search is biggest (₹9.9L, 27% of money). 89% to 93% of signups buy in every channel.

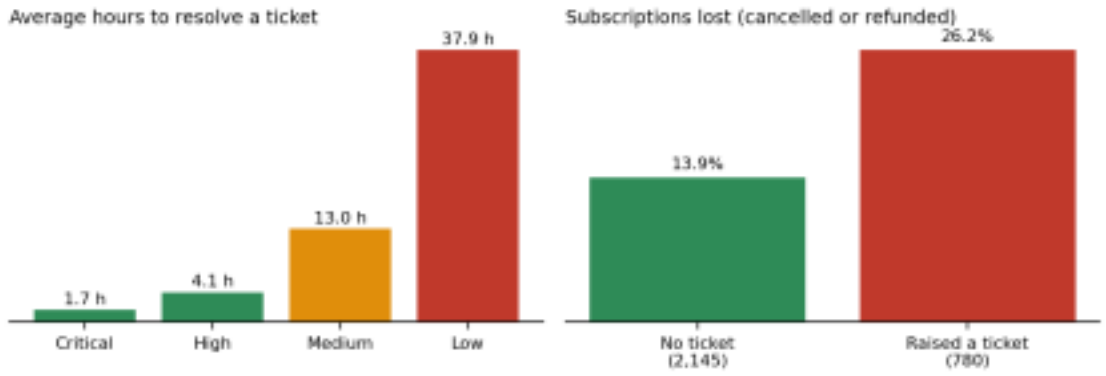

Result: guess 2 is right. FESTIVE20 is the biggest giveaway and brings no better customers. Email Campaign brings customers who leave sooner.

Guess 3: Customers who need help and wait leave more

No ticket	2,145	2.8%	11.1%	13.9%	38.7%
1 ticket	647	7.9%	14.4%	22.3%	32.6%
2 tickets	101	20.8%	19.8%	40.6%	12.9%
3 or more tickets	32	40.6%	18.8%	59.4%	9.4%
Any ticket	780	10.9%	15.3%	26.2%	29.1%

• **27 out of every 100 subscriptions have a ticket.** These customers are lost **1.9 times as often** (26.2% vs 13.9%). The more tickets, the worse it gets: 22% lost with 1 ticket, 41% with 2, 59% with 3 or more.

• Refund requests explain part of it (55% of those were lost). But even customers with *other* problems leave more: 16.3% cancelled vs 11.1% with no ticket.

Critical	87	1.7 hours	0.0%	4.3
High	196	4.1 hours	0.0%	4.1
Medium	368	13.0 hours	0.0%	4.0
Low	299	37.9 hours	70.0%	3.1

• Critical, High and Medium tickets are fixed fast (all within a day). **Low-priority tickets are the problem:** 38 hours on average, and 70% wait over a day. That is 299 tickets (31% of all).

Under 4 hours	221	4.16	12 of 161 (7%)
4 to 12 hours	246	3.91	26 of 184 (14%)

12 to 24 hours	237	4.05	13 of 178 (7%)
24 to 48 hours	95	2.72	31 of 74 (42%)
Over 48 hours	101	2.87	31 of 76 (41%)

• **Waiting makes customers unhappy.** The happiness score drops from 4.2 to about 2.9 after a day. 41% of those who waited over 48 hours gave 1 or 2 stars (vs 7% when fixed in under 4 hours). • **Waiting also costs us customers.** If the ticket took over 24 hours, 31% were lost, vs 25% if it was fixed within a day. 50 tickets are still open.

• **It is not about one agent.** Manoj Sharma looks slowest, but 38% of their tickets are Low priority (usual: 30%). The wait comes from the Low-priority line, not the person.

• **Fix the cause too:** Missing Items (209) and Delivery Delay (180) are 41% of all tickets. **Result:**

guess 3 is right. Support is the biggest hidden leak.

What is healthy: All produce types and channels grow. Herbs & Greens, Society Campaign, Amrit Agro and Kisan Farms keep customers best. Critical, High and Medium tickets are fixed fast.

What is leaking: Slow Low-priority support, late and missing Dairy & Eggs deliveries, a few farms and boxes, the FESTIVE20 coupon, and Email Campaign. In total, **502 subscriptions** (17%) were lost. Those customers had paid ₹6.2L.

Where to put the money (in order)

1	**Support** (first)	Fix Low-priority tickets within 24 hours. Clear the 50 open tickets. For refund requests, offer a replacement box or credit first. Fix delivery and packing problems.	Customers with tickets are lost 26.2% vs 13.9%. Low tickets take 37.9 hours. Lost customers rise from 25% to 31% when the wait passes a day.
2	**Dairy & Eggs**	Make delivery windows tighter, check boxes for missing items before they leave, and give a quick credit when something goes wrong. Start with Haritha Growers and Riverbend Farms.	Most cancellations (15.7%) and most tickets (40.5 per 100).
3	**Farms and boxes**	Review Heritage Rice Collection, A2 Milk Subscription, Healthy Snack Crate and Citrus Crate. Talk quality with Monsoon Organics, Riverbend Farms and Terra Growers. Copy Amrit Agro and Kisan Farms.	These boxes lose 22% to 27% of customers.
4	**Coupons**	Stop FESTIVE20 all year. Keep it for real festival weeks or first-time buyers. Test by switching it off for a few weeks.	It costs ₹2.6L (69% of discounts) and brings no better customers.
5	**Channels and growth**	Fix Email Campaign. Look at why Referral customers cancel. Put more money behind Society Campaign and Herbs & Greens. Ask finance for the cost of each channel.	Email Campaign 20.6% lost. Society Campaign 14.2% lost.

Keep in mind: the data shows links, not proof. None of the sheets has cost data, so we cannot work out return per rupee. Newer subscriptions are still going on, so their finish rates will rise.

4. PageTurn

The question: PageTurn must decide where to put next quarter's money: genres, authors, channels, coupons or the support team. Where is it healthy, where is it losing money or readers, and what should we do?

"Lost" means readers whose purchase is Abandoned or Returned (they started, then left). **"Finished %"** means the share of all purchases that are finished.

A. Where are we doing well and growing?	Places that bring in good money *and* keep their readers. Put more money here.	Purchases, money collected, finished %
B. Where are we losing money or readers by our own mistakes?	Places where we give money away (discounts), give money back (returns), lose people halfway, or let them down with slow help.	Discounts, returned %, abandoned %, how long tickets wait

We then check the five choices leadership gave us: **genres**, **authors**, **channels** (the ways people find us), **coupons** and the **support team**.

We join the sheets using the ID that they share:

Purchases	Readers	Reader ID	how each reader found us
Purchases	Titles	Title ID	genre, length and price of each purchase
Titles	Authors	Author ID	who wrote each title
Support Tickets	Purchases	Purchase ID	which purchases had a complaint

The columns we need:

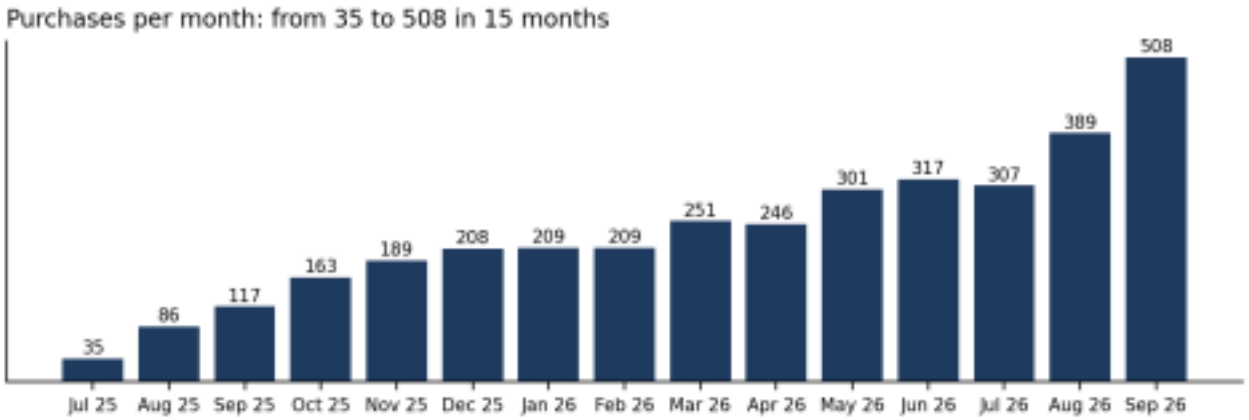

Growth	Purchase Timestamp, Amount Paid, Genre, Author Name	Purchases and money, month by month
Staying or leaving	Status, Reading Progress %	Finished %, Abandoned %, Returned %
Money given away	Coupon Code, List Price, Amount Paid	Discount = List Price − Amount Paid
Authors	Author Name, Avg Rating	Do high-rated authors keep more readers?
Channels	Acquisition Channel, Signup Date	Signups who buy, Finished %, Lost %
Support	Created At, Resolved At, Priority, CSAT Rating	Hours to fix, happiness score, Lost % with a ticket

Our 3 guesses (hypotheses):

Guess 1: Every genre grows, but a few authors and titles lose readers, and a high rating does not protect us.

Guess 2: Coupons give away money without bringing better readers, and some channels bring readers who read less.

Guess 3: Readers who have problems and wait for help leave more.

Monthly purchases grew from 35 (Jul 2025) to 508 (Sep 2026). Monthly money grew from ₹11 thousand to ₹1.3 lakh. One purchase is only about ₹253, so the rupee amounts here are small.

Guess 1: Every genre grows, but a few authors and titles lose readers

1a. Genres

Kids & Young Adult	606	₹1.7L	₹1.6L	5.9%	10.2%	38.8%	16.2%
History & Culture	590	₹1.7L	₹1.6L	4.6%	10.8%	35.1%	15.4%
Fiction	587	₹1.6L	₹1.5L	6.1%	12.3%	34.9%	18.4%
Self-Help	614	₹1.5L	₹1.4L	5.9%	10.4%	35.7%	16.3%
Business & Finance	575	₹1.4L	₹1.3L	5.6%	13.9%	34.4%	19.5%
Technology	563	₹1.2L	₹1.1L	5.2%	11.2%	35.9%	16.3%

- All six genres grew 4.2 to 5.6 times. Kids & Young Adult and History & Culture earn the most (₹1.7L each).
- Long Reads are 22% of purchases but 42% of the money.
- Business & Finance loses the most readers (19.5%, with 13.9% giving up). History & Culture loses the fewest (15.4%).

1b. Authors (most lost readers at the top; red = worst, green = best)

Rohan Khan	4.6	373	₹90K	5.1%	15.5%	33.5%	20.6%
Lakshmi Khan	4.3	234	₹39K	7.3%	12.4%	36.3%	19.7%
Priya Das	4.4	183	₹38K	4.4%	13.7%	35.0%	18.0%
Karan Gupta	4.4	394	₹69K	6.6%	11.4%	33.5%	18.0%
Manoj Mehta	4.1	285	₹79K	6.3%	11.6%	33.3%	17.9%
Geeta Verma	4.4	352	₹77K	5.7%	11.6%	32.7%	17.3%
Riya Chauhan	4.5	202	₹48K	6.4%	10.9%	36.1%	17.3%
Zoya Nair	4.1	289	₹82K	5.5%	10.7%	36.0%	16.3%
Pooja Chauhan	3.9	68	₹37K	1.5%	14.7%	36.8%	16.2%
Neha Kulkarni	4.7	317	₹84K	6.3%	9.8%	41.3%	16.1%
Naveen Bose	4.4	380	₹83K	5.5%	10.0%	36.3%	15.5%
Riya Joshi	4.8	65	₹35K	4.6%	10.8%	36.9%	15.4%
Fatima Banerjee	4.0	238	₹89K	2.9%	9.7%	38.7%	12.6%
Ramesh Yadav	4.1	155	₹44K	4.5%	7.7%	40.6%	12.3%

- **Rohan Khan** earns the most (₹90K) but loses 20.6% of readers and 15.5% give up (the most). His **The Founders Notebook** loses 27.8%.
- Other weak titles: Cyber Safe at Home (26.8% lost), The Last Monsoon (22.3%), The Calm Mind (21.9%).
- **Ramesh Yadav** (12.3% lost), **Fatima Banerjee** (12.6% lost, only 2.9% returned) and **Naveen Bose** (15.5% lost) keep readers well.

Surprise: a high rating does not protect us. Authors rated above 4.4 lose **18.1%** of readers. Authors rated 4.0 or less lose only **13.4%**.

Result: guess 1 is right. Growth is healthy. The trouble sits in a few authors and titles, and ratings do not show it.

Guess 2: Coupons give away money, and two channels bring readers who read less

2a. Coupons

FESTIVE20	20%	1,136	32.1%	₹65K	70.9%	17.8%	35.7%
FIRSTPAGE10	10%	264	7.5%	₹7K	7.6%	18.2%	39.0%
REFER15	15%	152	4.3%	₹6K	6.8%	17.1%	28.3%
STUDENT25	25%	208	5.9%	₹14K	14.7%	18.8%	34.6%
No coupon	0%	1,775	50.2%	–	–	16.1%	36.2%

• Half of all purchases use a coupon (1,760 of 3,535). Discounts cost **₹92 thousand**.

• **FESTIVE20 is 71% of that** (₹65K). It runs every month, and in Sep 2026 it was on **198 purchases (39%)**, the most in nine months.

• FESTIVE20 readers are not better, and slightly worse: 17.8% are lost (vs 16.1%) and 6.2% return the title (vs 5.0%).

• Other coupons are used correctly. REFER15 readers finish the least (28.3%).

The rupees are small (10% less FESTIVE20 saves only about ₹6,500). So the reason to limit it is better readers, not savings.

2b. Channels (how readers find us)

Organic Search	344	91.9%	903	₹2.3L	2.62	37.1%	18.6%
Paid Social	329	92.4%	817	₹2.1L	2.48	39.9%	15.1%
Referral	286	90.6%	734	₹1.8L	2.57	30.1%	16.9%
Email Campaign	174	90.2%	432	₹1.1L	2.48	37.7%	18.3%
Influencer	165	92.1%	392	₹1.0L	2.38	32.4%	17.6%
Book Club	102	94.1%	257	₹65K	2.52	36.6%	14.8%

• **Paid Social brings the best readers:** 39.9% finish and only 15.1% are lost. **Book Club** is also good (14.8% lost) but small.

• **Referral and Influencer readers read the least:** only 30.1% and 32.4% finish. Influencer also has the most

returns (7.4%).

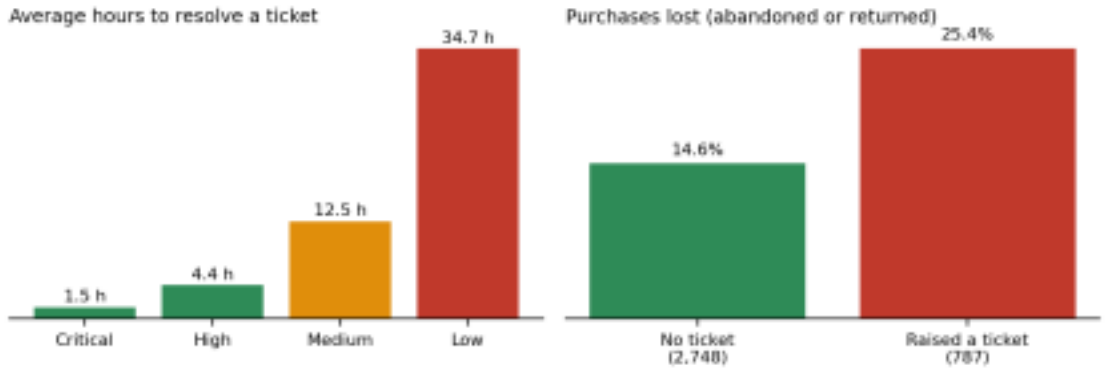

• Organic Search is biggest (₹2.3L, 25% of money) but loses 18.6%.

Result: guess 2 is right. FESTIVE20 is the biggest giveaway and brings no better readers. Referral and Influencer readers read much less than Paid Social readers.

Guess 3: Readers who have problems leave more, and waiting makes them unhappy

No ticket	2,748	3.7%	10.9%	14.6%	37.5%
1 ticket	649	9.1%	13.9%	23.0%	32.5%
2 tickets	119	21.8%	9.2%	31.1%	20.2%
3 or more tickets	19	52.6%	21.1%	73.7%	0.0%
Any ticket	787	12.1%	13.3%	25.4%	29.9%

• **22 out of every 100 purchases have a ticket.** These readers are lost **1.7 times as often** (25.4% vs 14.6%). The more tickets, the worse it gets: 23% lost with 1 ticket, 31% with 2, 74% with 3 or more. • Refund requests explain part of it (54% of those were lost). But even readers with *other* problems leave more: 15.2% abandoned vs 10.9% with no ticket.

Critical	68	1.5 hours	0.0%	4.1
High	231	4.4 hours	0.0%	4.0
Medium	394	12.5 hours	0.0%	4.0
Low	257	34.7 hours	64.9%	3.2

• Critical, High and Medium tickets are fixed fast (all within a day). **Low-priority tickets are the problem:** 35 hours on average, and 65% wait over a day. That is 257 tickets (27% of all).

Under 4 hours	201	4.08	11 of 150 (7%)
4 to 12 hours	300	3.94	21 of 215 (10%)
12 to 24 hours	248	3.97	21 of 190 (11%)
24 to 48 hours	91	2.96	25 of 68 (37%)

Over 48 hours	68	2.91	22 of 54 (41%)

• **Waiting makes readers unhappy.** The happiness score drops from 4.1 to about 2.9 after a day. 41% of those who waited over 48 hours gave 1 or 2 stars (vs 7% when fixed in under 4 hours). • **But we cannot yet prove that waiting makes readers leave.** 26% were lost when the ticket took over 24 hours, vs 25% when it was fixed within a day. That is almost the same. 42 tickets are still open.

- **It is not about one agent.** Agents only range from 14 to 19 hours on average. What sets the wait is the ticket priority, not the person.
- **Fix the cause too:** App Crash (204), Download Problem (193) and Library Sync (113) are 54% of all tickets.
- **Keep help cheap.** One purchase is only about ₹253, so a long human reply can cost more than the sale. Self-help answers and automatic fixes make more sense than hiring more agents. (We have no cost per ticket, so finance should check.)

Result: guess 3 is partly right. A ticket is a strong warning sign. Waiting clearly makes readers unhappy, but we cannot yet show it makes them leave.

What is healthy: All genres and channels grow. History & Culture, Kids & Young Adult, Paid Social and Book Club do especially well. Critical, High and Medium tickets are fixed fast.

What is leaking: App problems and Low-priority support, a few authors and titles, the Referral and Influencer channels, and the FESTIVE20 coupon. In total, **601 purchases** (17%) were lost. Those readers had paid ₹1.5L.

Where to put the money (in order)

1	**App and support** (first, cheaply)	Fix app crashes, download problems and sync bugs. Add quick self-help answers in the app. Fix Low-priority tickets within 24 hours. For refund requests, offer another title or credit first.	Readers with tickets are lost 25.4% vs 14.6%. Low tickets take 34.7 hours. App problems are 54% of tickets.
2	**Authors and titles**	Review The Founders Notebook, Cyber Safe at Home, The Last Monsoon and The Calm Mind (better previews and descriptions). Show a sample before buying in Business & Finance. Learn from Ramesh Yadav, Fatima Banerjee and Naveen Bose.	These titles lose 22% to 28% of readers. Ratings do not warn us.
3	**Channels**	Put more money behind Paid Social and Book Club. Fix Referral and Influencer: send readers the right titles. Ask finance for the cost of each channel.	Paid Social: 39.9% finish. Referral: 30.1%. Influencer: 32.4%.
4	**Coupons**	Stop FESTIVE20 all year. Keep it for real festival weeks or first-time buyers. Test by switching it off for a few weeks in one channel.	On 39% of purchases in Sep 2026. Its readers are lost more (17.8% vs 16.1%).
5	**Growth**	Back History & Culture and Kids & Young Adult. Push Long Reads.	History 15.4% lost. Long Reads are 42% of the money.

Keep in mind: the data shows links, not proof. None of the sheets has cost data, so we cannot work out return per rupee. Newer purchases are still going on, so their finish rates will rise.
