THE

PIT LANE COLLECTIVE

F1 INSPIRED APPAREL

BUILT FOR THE FAST LANE.
WORN BY THE OBSESSED.

MESA School of Business
Team 24

In 21 days we sold ₹1.18 lakh of motorsport streetwear — with zero marketing spend

Every order prepaid before we produced a single shirt.

₹1,18,479	70	97	₹0
REVENUE IN 21 DAYS	ORDERS, ALL PREPAID	SHIRTS PRODUCED	SPENT ON MARKETING

PROFIT BRIDGE

Revenue	Cost of goods (97 × ₹630)	Delivery (55 courier × ₹110)	Payment fees	Profit — 43.2% margin
₹1,18,479	−₹61,123	−₹6,050	−₹118	₹51,188

We are cash-flow positive from week one because customers pay before we produce. Growth needs orders, not capital.

Three designs drive most of our revenue — and every shirt makes over ₹550

Made to order, printed on demand, no dead stock.

DESIGN 01 Crimson Wordmark Tee

DESIGN 02 Its Hammer Time

DESIGN 03 Paddock Cream Tee

Figures are Cluster 1 fulfilment data.

UNIT ECONOMICS — ONE SHIRT

Selling price	₹1,299	
Cost of goods	−₹630	
Courier delivery	−₹110	
Margin, couriered	₹559	43.0%
Margin, Bengaluru — we deliver	₹639	49.2%

A Bengaluru order we deliver ourselves earns ₹80 more than the identical shirt couriered.

Our first channel worked — then it ran out. Week 5 fell 82%.

We sold to everyone we know. Now we have to sell to people we don't.

WEEKLY RUN RATE

Week 4 was our best week. Week 5 is what happens when the address book empties.

WHERE THE REVENUE CAME FROM

People we already knew	88.7%
Everyone else	11.3%

01 88.7% of revenue came from people we already knew. That pool is finite and we have now reached the bottom of it.

02 Our online store has produced ₹0 and we have spent ₹0 on marketing — so our two biggest levers are completely untested, not exhausted.

03 Repeat rate is 5.7% (4 of 70 orders). We have 66 customers who have bought once and never been asked again.

₹5 lakh is a channel problem, not a capital problem — here is what each target costs us

19 days left. Same 43% margin at every level.

₹5 lakh	BASE CASE
Still to sell	₹3,81,521
Per day	₹20,080
Vs best week	1.7×
Shirts to sell	294
Profit at 43.2%	₹2,16,000

₹6 lakh	PUSH
Still to sell	₹4,81,521
Per day	₹25,343
Vs best week	2.2×
Shirts to sell	371
Profit at 43.2%	₹2,59,200

₹10 lakh	STRETCH
Still to sell	₹8,81,521
Per day	₹46,396
Vs best week	4.0×
Shirts to sell	679
Profit at 43.2%	₹4,32,000

Current pace = ₹5,642/day. Best week = Week 4 at ₹11,684/day.

01 Turn on the online store and run our first paid campaign. Zero to date, and it is the only channel that scales past our own address book.

02 Sell where the customers already are — campus pop-ups, the MESA flea, and motorsport watch-parties on race weekends.

03 Go back to the 66 people who bought once. A 20% repeat rate adds roughly ₹22,000 with no new customer acquisition.

04 Push Bengaluru orders. We hand-deliver those, which is ₹80 more margin per shirt than couriering.

₹5 lakh needs 1.7× our best week, sustained. ₹10 lakh needs 4×. We are picking the number we can actually defend.
