Every jaggery brand says “pure.” We're the one that hands you the test.

1. **Sourced from the Muzaffarnagar belt -** the region that earned India's Geographical Indication tag for jaggery in 2023 the same kind of protection that ties Champagne to Champagne.

2. **No sulphur, no whitening agents -** clarified the old way with okra pulp over a wood-fired kolhu, not a chemical shortcut.

3. **No refined sugar, no glucose syrup, no palm oil -**and that applies to the chikki and trail mix too, not just the raw jaggery.

4. **Village sourcing, licensed facility -** most brands only ever tell you one half of that story we're built on both.

5. **We publish a one-minute home adulteration test -** on our own website, and dare you to run it on our gud — or anyone else's.

Jaggery brands stop at powder. Snack brands skip jaggery.

Almost nobody sits in the top-right box.

Commodity jaggery brands own the powder aisle. Mass mithai and general “healthy snacking” brands own the shelf space. **Nobody owns the full jaggery snacking basket, honestly sourced.** That's the box we're building in.

CHANNEL

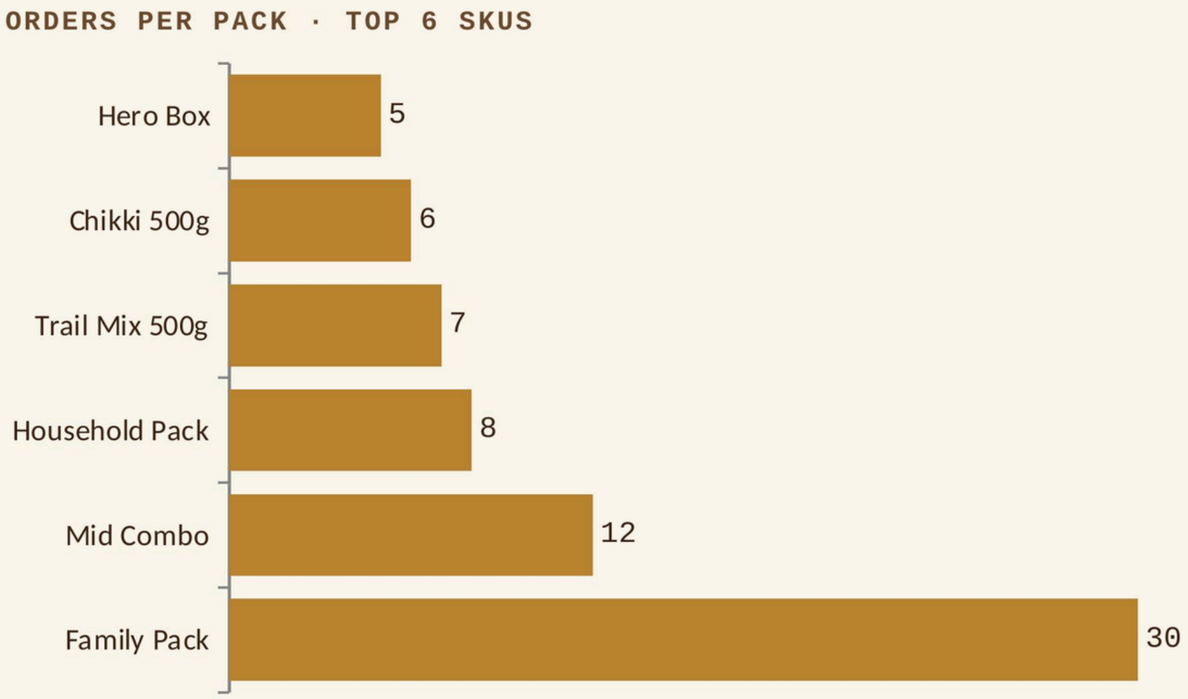

Direct to your door, on purpose.

Every order so far has come through **jaggujaggery.in**, running on pre-order while the first batch is made, pushed out through WhatsApp and our own network. No marketplace commission, no algorithm sitting between us and the first people who trusted us with real money.

“We're just getting started deliveries take slightly longer for now. Thanks for being early.” - the banner on jaggujaggery.in, today.

₹93,311 booked. 117 pre-orders. Zero ad spend.

More than half of all orders are for a bundle, not a single pack. Family Pack + Mid Combo + Household Pack + Hero Box alone account for 55 of ~103 logged orders. People want us to have already decided the box for them.

Average order value so far: **≈ ₹798.** Look closer and **41.6% of all revenue rides on orders that include the Family Pack alone** strong proof of what people want, and a reminder we're still leaning on one hero SKU.

Figures from the live order log through yesterday 103 named orders shown here reconcile to the ₹93,311 booked; the full pre-order count (117) includes guest checkouts not tied to a name.

Cold outreach hasn't landed yet. One warm order just did.

WHERE WE ARE

B2B is still cold-lead territory for us nothing closed from outbound yet. Being upfront about that: it's the one box on this deck we haven't ticked. The B2B pair chases cafés and gift orders; the offline pair keeps weekend stalls running. The website stays live as a third channel, converting everyone we meet on either side.

WHAT JUST HAPPENED

₹50,000 party order, being fulfilled this weekend.

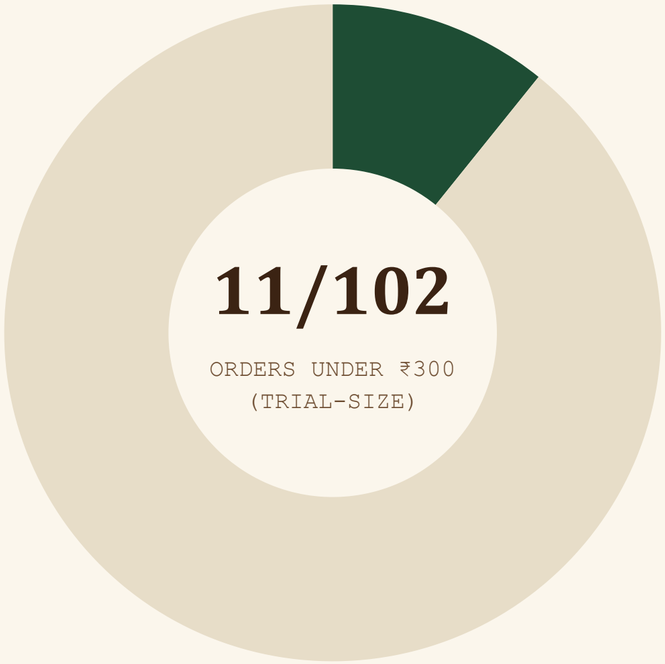

Our first real proof point for events and corporate gifting and it points straight at the sachet line we've scoped for cafés and offices.

WHAT IT UNLOCKS NEXT

- **Events & weddings**
- **Corporate gifting**
- **Café / office sachets**

The biggest lever isn't a bigger box.

It's a cheaper door in for strangers.

67.6% of our orders are already ₹700+, and the Family Pack alone drives 41.6% of revenue that's a warm, personal-network audience walking in ready to commit. Only **11 of 102 orders (11%) are a small trial pack.** The moment we go cold, paid ads, outbound B2B that ratio works against us. Nobody buys a ₹1,189 box from a brand they've never heard of.

The Family Pack sells itself to people who already trust us. Strangers need a cheaper door in so the plan is a dedicated ₹99–149 "first taste" offer, built for cold traffic, not our existing list.

1 · Price a ₹99–149 sampler

2 · Route cold traffic there first

3 · Upsell to Family Pack after

Thank you.
