Tell me – How can one *grow any business?*

How can anyone grow revenues!

P.I.T.A

The *components* of PITA

P stands for Population

This is the total population by segment. All individuals in segments are part of the population regardless of whether they use your products and services or not.

I stands for Incidence

Penetration / Conversion rate (share of individuals in the population that are users/customers of your products and services).

T stands for Transaction rate

Average number of times that users interact with your products and services.

It is important to convert new users into loyal users, but transaction rate explains how heavy or light the users are

A stands for Amount

Number of products or services per transaction

PITA model for Shavers!

P	I	T	A
48 Cr (All male between 15-55)	73% (Shelf Shavers)	2 (Buys twice a year)	50 (Rs per transaction)

Rs 3360 cr

PITA – *The levers* that drive your volume and revenue

Group activity

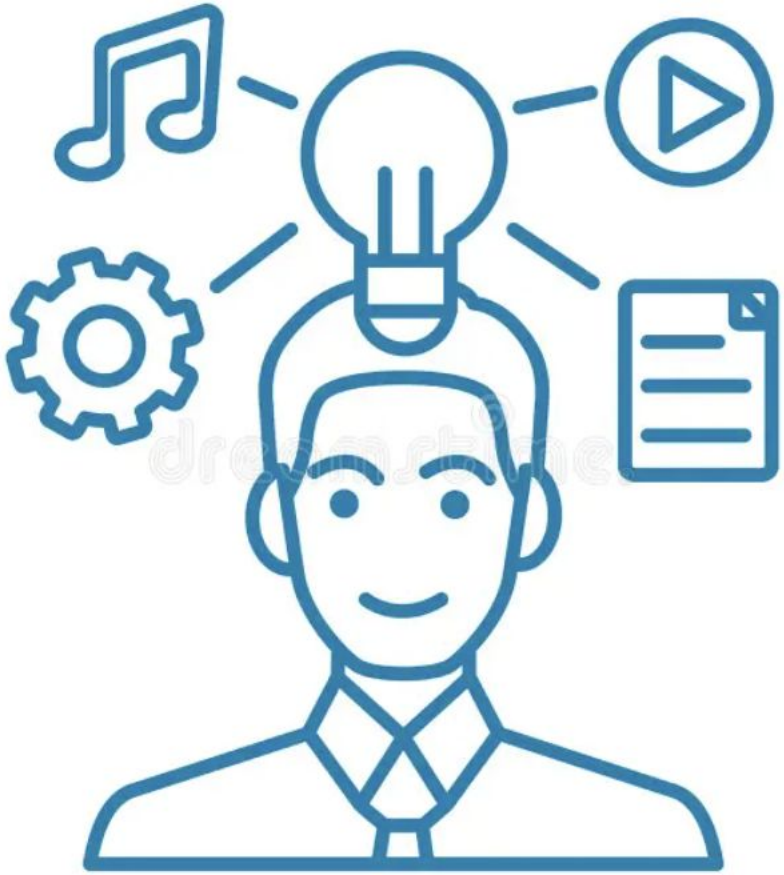

Sensitivity Toothpaste.

Identify the ***PITA parameters***

Discuss with your team and ***plot P.I.T.A***

SENSODYNE want to ***increase its revenues by 50%*** in the next two years. Which parameter(s) will you recommend

You can make assumptions and please share the same.

Scenario 1 - Rural Oral Care

Total population of India is ***120 cr. and 70% of that resides in Rural***.

The oral care penetration in ***Rural market is 75%.*** Penetration is defined as those people who brush with toothpaste in a year. 99% of the rural consumers brush only once a day.

Sensodyne is leading sensitivity toothpaste that has a ***market share of 10%.*** A large part of the market share is driven by urban markets. Sensodyne wants to increase its focus in Rural towns. Sensodyne is an expensive toothpaste which is 50% more expensive than the leading toothpaste in the country

Basis a research and survey, Sensodyne found out more about the kind of toothpaste that rural consumers use. Below is the result (Percentage population)

Anti - Cavity – 45%
Freshness Toothpaste– 25 **%**
Herbal Toothpaste – 25%
Sensitivity – 5%

As per Sensodyne records, the number of *Unique users every year in rural markets is 2.5 cr and they buy 3 tubes a month*. Sensodyne is available in 15 states in the country which contribute 60% of the rural population

Scenario 2- Urban Transportation

Total population of ***Urban India is 37 cr.***

Top 65 towns in this country with greater than ***10 lac population is 15.18 cr***.

67% of the population is between the age of 15-60.

Out of the total population of those aged between15-60 years, ***74% travel to work every day***.

Basis research and survey, UBER found out more about ***how people travel to work***. Below is the result in the form of % trips by each mode.

Private Transport – 32%
Mass public Transport (Bus, Trains, metro, waterway)– 15**%**
Integrated Public Transport (taxi, auto) – 15%
Others (walk, cycle) -36%

As per UBER records, the number of ***Unique users*** every month in the top 65 towns is ***23 lac and total trips is 95 lacs***. The average revenue generated per trip is Rs 250.

PITA – The levers that drive your volume and revenue

	P		I		T		A		Total revenue		Increase in revenue
Cohort 1, Base scenario	100,000		10%		1		500		5,000,000		

Say, by using bundle offers, your conversion jumps to say 15%, Keeping everything else the same, your revenue will grow by almost 50%.

	P		I		T		A		Total revenue		
Cohort 1, Base scenario	100,000		15%		1		500		7,500,000		50%

By getting our customers to spend 30% more will also drive our volume by identical percentage.

	P		I		T		A		Total revenue		
Cohort 1, Base scenario	100,000		10%		1		650		6,500,000		30%

Measures

Volume

- ✔ **Impression** – Volume of Content Viewed Online
- ✔ **Reach** – No of unique user who viewed the content
- ✔ **Unique Visitor** – No of Unique Visitors to the desired Landing page
- ✔ **Session** – Total number of visits to the site/Landing page

Quality Measure

- ✔ **Installs Rate-** Refers to app installs/Total Session. (Visit Conversation Rate)
- ✔ **CTR** (Click Through Rate)- Clicks/Impression
- ✔ **VTR** (View Through Rate) – Views/Impression (Duration of view can be pre-defined)
- ✔ **Order Conversion** – Total Orders/Sessions
- ✔ **Bounce Rate** – Single Page Visits*100/All visits starting on Page

Measures

Media

- ✔ **CPM (Cost per Mille)** – Cost per 1000 Impressions
- ✔ **CPC (Cost per Click**)- Cost per Click
- ✔ **CPV (Cost per View)** – Cost per View

Acquisition Cost/Sales

- ✔ **CAC (Cost per Acquisition)** – Cost Media/Total First time orders
- ✔ **ROAS (Return on Ad spend)** – Total Sales/Ad spends
- ✔ **AOV (Average Order Value)** – Sales/Total Orders

Branding

- ✔ **Awareness** – Total mentions of Brand/Total universe sampled
- ✔ **TOM** – First Brand mentioned/Total Universe Sampled
- ✔ **Preference** – Brand Preferred/Total Universe Sampled

Exercise 3 – Calculate the Metrics

Measure	Value
Impression	2,00,00,000
Ad Spend	3,00,000
Click Through Rate (CTR)	0.40%
Session	30,000
Registrations	4,000
Add to Cart	3,000
First Time Orders	800
Repeat Orders	200
Total Orders	1,000
Total Sales Generated	10,00,000

Ready Reckoner

Metric	Volume	Quality	Cost	Acquitison/Sales	Brand
Reach	Impression		CPM, CPV		Awareness
Act		CTR, VTR, Session, installs, Registration	CPC, Visitor Conversion (Install Rate)		Preference
Convert	Orders	Conversion	CAC ROAS	AOV, Total Sales	MOUB
Engage	Repeat Order	RFM	Blended ROAS	Repeat Sales	TOM
