GROUP ACTIVITY – SALES UPDATE

90 seconds per team. Four facts only.

01

What you're selling and to whom

One product. One USP. Your selling price today.

02

Sales so far

Units sold · revenue to date · repeat customers.

03

Channels used

Where you've already tried to sell, not where you plan to.

04

Biggest problem right now

One sentence. The thing that woke you up this morning.

CORE FRAMEWORK

The 3-Lens Framework

Three questions. Pick the one you can't answer – that's your weak lens.

LENS 01

Product

"Is there something worth buying, right now?"

What weak looks like

No SKU live · price confused · no clear reason to choose you over someone else

e.g. Neha's skincare (22% return rates)

LENS 02

Channel

"Are the right people actually seeing it?"

What weak looks like

Posting where you're comfortable, not where your buyer already is.

e.g. Arjun's protein bars (declining visits)

LENS 03

Conversion

"Of the people who see it, how many buy?"

What weak looks like

Reach but no close. Confusing page or pitch or proposition · no proof · payment friction · no reason to buy

e.g. Priya's candles (1.5% conversion)

Revenue only moves when the **weakest lens** is the one that's worked on. Polishing an already-strong lens harder returns almost nothing.

INSIDE LENS 02 · CHANNEL

A channel isn’t good or bad. It has to match how the product gets bought.

STRANGERS, FAST

Impulse, low consideration

Buyer doesn’t know you - and that doesn’t matter. Decision in under 30 seconds.

Channels that work

Instagram paid · Swiggy Instamart · marketplace listings · campus stalls.

WARMER, SLOWER

Higher price, trust-dependent

Buyer needs to know YOU, or someone they trust, before the money moves.

Channels that work

Personal DM · referral · WhatsApp broadcast · community recommendation · social mention.

Wrong channel for the price = you’ll burn the week.
Pick the channel your buyer already lives in.

THE FASTEST BRIDGE

For most of you, the fastest bridge is founder-led sales.

A better ad isn't what moves your week-1 number. You, personally, messaging your first **50–100 prospects**, is. Trust is carried by the person.

When your Channel lens is weak and your Conversion lens is shaky, this skips both - and proves the offer works in days, not weeks.

THIS WEEK, BEFORE YOU SPEND ON ADS

Make a list of **50 people** you already know. Classmates, seniors, family friends. Send each one a personal message this week
Track: messages sent · replies · orders. That list is your real week-1 metric.

THE NEXT 60-MIN EXERCISE

Your First 10 customers come from this list.

30 specific people. Not "anyone who buys" – the next 10 people you'll personally message.

01

10 closest friends

Roommates, project partners, best friend from school. They already trust you.

02

5 classmates in different circles

Not your project group – people you cross only at mess / library. They become brokers.

03

5 seniors / mentors / advisors

Seniors have alumni networks, internships, side hustles. Their "yes" is high-leverage.

04

10 family / family friend

Adults in your extended family have their own networks. One yes here → 5 more yeses.
