What is Marketing?

"An organizational function and a set of processes for ***creating*** , ***communicating*** and ***delivering*** value to customers and for managing customer relationships in ways that benefit the organization and its stakeholders…"

Source – A Framework for Marketing Management by Philip Kotler & Kevin Keller

Go to Market!

"is a set of actions you take to ***communicate*** and ***deliver the product*** or brand to its ***target consumer/Customer*** in way that is efficient, scalable, differentiated and profitable"

Case Study: Eggoz

1

Early Growth through Modern Trade & Q-Commerce

Eggoz scaled by expanding into retail chains and quick commerce platforms, capturing consumers already open to branded eggs.

2

Low Category Penetration

Despite progress, branded egg penetration in these formats remained far lower than comparable FMCG categories.

3

Barrier: Entrenched Heuristics of Freshness

Unbranded egg buyers trusted their own marker (like the retailer's credibility or how an egg cracked) leaving little reason to switch to a brand.

4

Unlock: Redefining Freshness & Health

Research revealed the need to challenge these beliefs, introduce new health markers, and seed fresh language that repositions the category.
