Exercise 1 – Work in Groups, Present in next class

Build this for Microsoft, Nike, Red Cross, Mesa, Uber

the Course

Session 1

Grounding -

- What is marketing
- The Course

Session 2

Critical Concepts

- Needs, wants, Demands
- Consumer vs Customer
- Marketing Environment

Session 3

Consumer Behavior

- Neuroscience
- Consumer Buying Behavior – Consumer Bias
- Consumer Funnels

Session 4

Target Consumer

- Segmenting & Targeting
- Pen Profiles
- Understanding Motivations

Session 5

Customer value

- Types of Benefits
- Differentiation
- Positioning

Mesa SCHOOL OF BUSINESS

the Course

Session 7

Go to Market 1

- Elements of GTM
- Anchor vs user TG

Session 8

Go to market 2

- Channel & Retail Environment
- Platforms

Session 9

Drive Growth & Measuring Success

- PITA
- Marketing Objectives
- Brand Health

Session 10

Measuring Success

- Business health
- Digital Funnel & Measurements

Prep For Next Session

Read about the consumers(in the slides below)

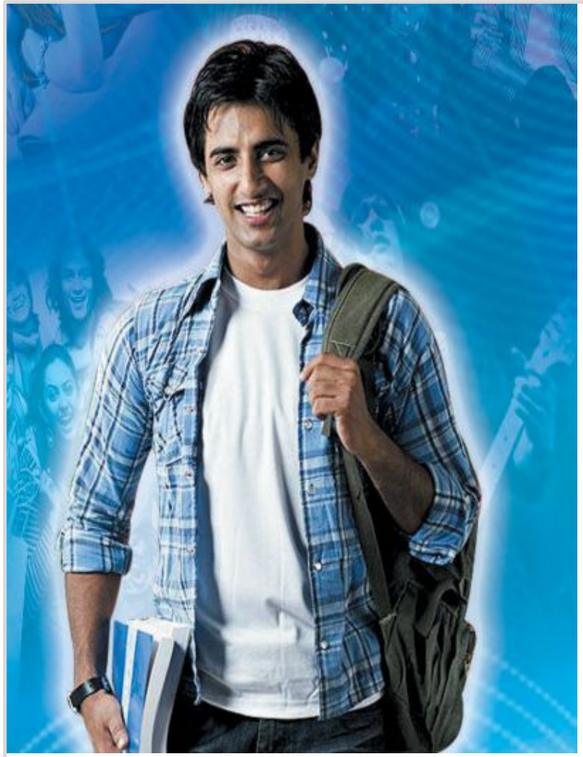

Session 2 Pre-Reads

Profiling Aditya (Adi) – Slide 3 -10

Profiling Shani Ram (Slide 11 onwards)

Hi….I Am Aaditya

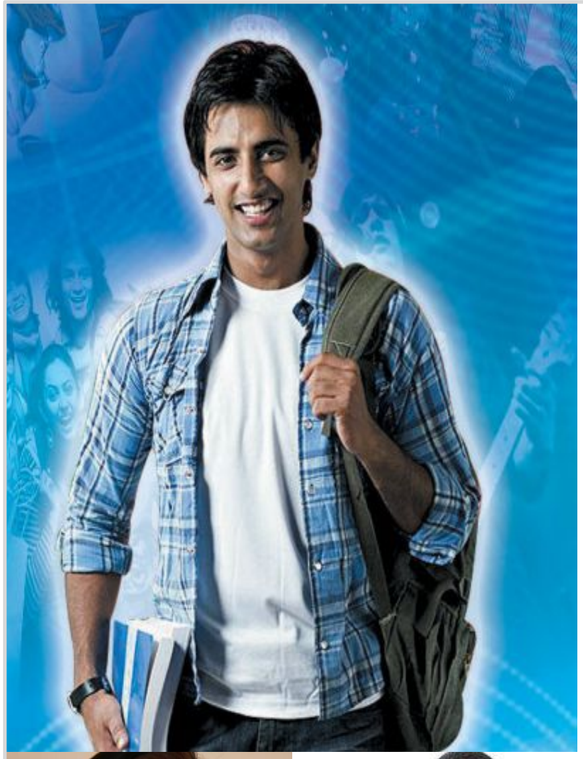

Most of my friends call me Adi….I am 21 and currently live in Bangalore city. I have got only a few minutes to chat…..meeting my friend Arhaan in about half an hour or so….we are going to check out the New Harley store that has just opened.

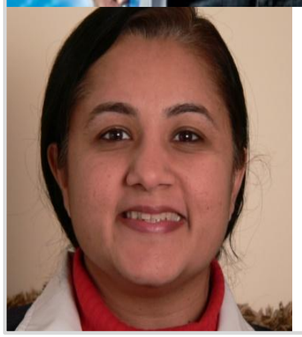

I am in my last year of Commerce…..

I have been taking photography lessons over the last one year and I plan to join one of my cousins as a intern in his publications. My real passion remains photography.

I plan to do a some free lance work over the weekends that will give me some experience and will help me build a portfolio. Hope to work for National Geographic one day and travel the world with them.

My Family

My dad is a doc…has his own thing @koramangala….that is him in the photo….before you say anything….I look like my mom!

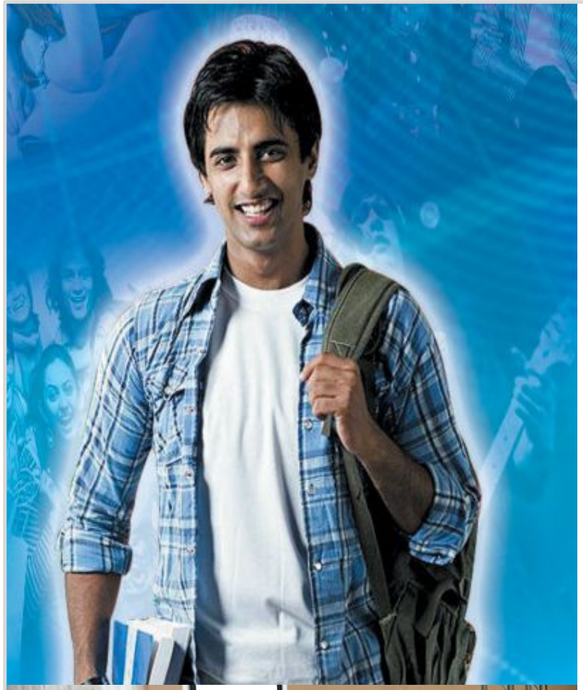

Ma is teaching at the school nearby. She is the best……protects me from Dad….Just Kidding!….and makes the most outstanding chicken ever!

We live in two and a half bedroom flat and I have a half to myself!!!

My parents are supportive of my passion to do photography……. But like any of the other folks….they seem a little bit paranoid. They have also advised that I sit for MBA entrance exams as a back up…..am not too sure of that…..would rather not.

Oh….i forgot to tell, apart from the publication thingy…….I also have an offer to join a gaming company…..that seems like fun!

The Gang

I have these great bunch of friends with whom I have developed a close relationship over the last 3 years of college. Here is a cool snap of some of them I took yesterday.

We are known as a pretty easy going and chilled out lot…… We hang out everyday after college…catch a movie…a cup of coffee….drive around. There are days, when just the guys catch up for a drink at Pecos or Purple Haze.

The guys, Arhaan, Prateik, Jared & Rohit are the best…..i trust them with my life. With these guys, I can be rest assured that life will always be truck loads of fun

How I Spend My Days

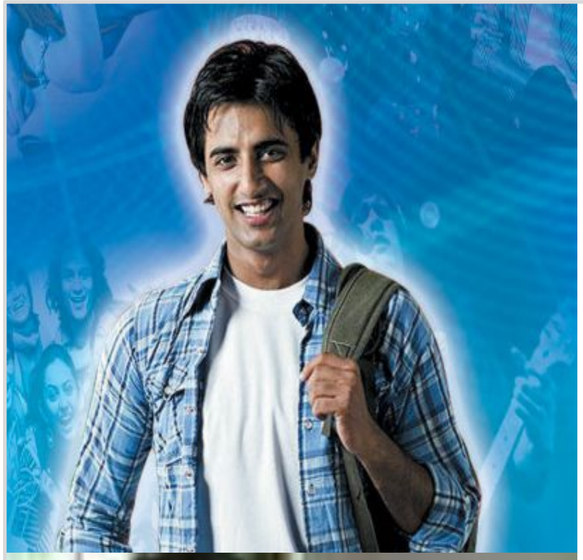

Stop by the gym before I get home.

Once I am home.....catch up on a bit of TV….chat on the phone….sync songs on the ipod……browse the net…facebook (but that I am on through the day thanks to my phone)…and before you know it…the day is over.

Oh Yes….sometimes gotta' do some college assignments also which keep me up at night…..unless I just get a copy of the assignment from someone else.

Mom often complains that I don't tell her about what is happening in my life……she claims all that she knows is what she sees on facebook!!..... Little does she know that I have given her restricted access only……..I think I will give her full access soon.

My Love Life….

As far as relationships are concerned, just got over one……..Her name is Jennifer…...We went out for over 9 months…..unfortunately….did not work out. She claimed that I did not give her enough time……hmm……. The guys think its for the best and don't think the demanding type is good for me. They also said I was a very different person when she was around!

But now…… there is this girl Neha who joined the group last year. Very pretty…. smart, funny and outgoing. Been trying to spend a lot of time with her.

Joined drama classes in college to be with her. I thought the sessions will be crap, but it is not too bad at all.

Also, I think this time with her worked…..think she is beginning to like me……will ask her out soon….

The good thing is….mom seems to like her too….whenever the gang come home…you can see the both of them chatting away.

My Style……

UNITED COLORS OF BENETTON.

A87

AÉROPOSTALE

I like to keep it simple…..with my tee and jeans or cargos….Tried out linens the other day….its pretty cool!

I shop around for brands…..and this other boutiques that sell seconds from brands like Gap, Banana Replublic & Aeropostale

I keep updating my wardrobe….but have my favorites that I will never get rid off. We have been through a lot together….like this one I am wearing right now was what I wore when we decided on the spot to drive to Chennai….. another story another day.

Got a massive collection of watches & belts…love them

My Entertainment

Love to watch movies….both Hindi & English. The current lot of Hindi movies are fantastic…unique and good story telling. On TV, I catch all the sports like football, cricket, basketball and formula one. I manage to sneak in a movie sometimes on one of the evenings. Also watch a lot of reality shows….some very good ones on air currently.

Just upgraded to an PS3…..looking forward to the new games that I plan to buy. Listen to a lot of music on my iPod……trying to convince Dad to give me an iPad this year for my birthday….otherwise will pick it up with my first salary in a few months from now.

Over the weekend, catch up with the guys to watch EPL and Formula One race. Love travelling…… just recently camped out at Nagarhole National Park with the gang….got some great photos. Love to drive …..especially my friend’s SUV. Looking forward to buying my first car soon.

What I Want From Life

Gosh….that's a tough one….. Where do I start……want money…….but don't want to tread the MBA path….would love to do it through the lens…..

Want my own pad……design the interiors myself…would love the first car to be an SUV…lets see!

Want Neha for now…..Want to take my friends wherever I go……don't want to lose them after I leave college….want us to do the same things tomorrow what we do today. People say as we get older and get more responsible…..life will become duller…….damn!!!!!.... would hate for that to happen. With the guys, I doubt that will. In fact, we have made a pact that no matter where we are…..we will meet once a year and do road trips!!!

Speaking of road trips…..Want to travel…..the world is a big juicy invitation that screams "try me"…and that's exactly what I am going to do…..I am up for Anything….bring it on.....My parents to be healthy and happy! Gosh …look at the time….got to go….will send you guys a Facebook invite…..will try and catch up on WhatsApp also.

Session 3 Pre-Reads

Profiling Aditya (Adi) – Slide 3 -10

Profiling Shani Ram (Slide 11 onwards)

Meet Shaniram & family

Shaniram, age 35, is small farmer in Samesi village in UP.

His family consist of his wife Saraswati Devi and children – Bhagmati(10), Ramesh (7) and Rahul (3)

Shani's parents passed away and his siblings have moved out of their home.

His brother sold his inheritance and opened a retail store in Hasanpur village, which is 15 km away

His elder sister, Shakuntala, got married and is now staying in Lucknow.

Saraswati is from Mauranva village (50 km away) and moved to Samesi 12 years back when they got married.

Shani’s Two hectare dream!

Shaniram inherited two hectares of land from his father.

His father used to plant only rice in July and harvest the same in Oct/Nov. Sometimes, he used to grow wheat in the rabi season. This was only done during emergencies or crop failure of the previous harvest

But Shani came to hear from other farmers and the pradhan on how he can crop the land more than once on a periodical basis.

For the last 2 years, he has been harvesting rice in Nov and wheat in March.

Before that, he used to work in other people’s farm from Nov to March.

Now, with wheat produce, he has doubled his income. Also, this helps him to store extra (rice and wheat) for contingencies.

Shani’s Two hectare dream!

In addition to wheat and Rice, Shani wants to add another crop between March and July

He has got information from the Mandi that he can grow peppermint. He is unsure on how to go about it and is worried about the impact it will have on the land.

Also, he has decided to buy a tractor…..

While his land does not require the full time use of a tractor, he believes he can generate additional income through the tractor by hiring it out to other farmers or use it for commercial haulage.

Saraswati also brings in money into the household

She is also an active income earner. She has been working over the last 2 years.

She seeks employment through NREGA. Last year, she did around 30 days of work earning Rs 120/ day.

She was involved in the creating a drainage outlet around the village, which she believes has helped in clearing the all the dirt around the village.

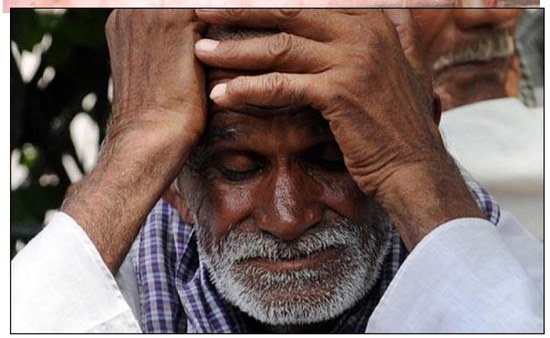

She is happy with the Anganwadi center that was established in this village 4 years back. She can now go to work keeping Rahul (3) under the able care of the Anganwadi worker.

She is also thinking of pursuing knitting classes which she believes will give her additional income that they can save up for the children

A lot has changed in the village… Things were very different in the past…

Shani reminisces that in past there were very limited resources available to them….

Money was hard to come by…..and there were times when they had little ability to spend.

He remembers those days of drought or crop failure which really stretched the family resources and savings.

Or when his sister was married and his father had to borrow from the local money lender for the marriage celebration. For the next few years, the whole family had to stretch to pay off the loan.

They had to use resources that were readily available

“ We did not use soap… we used Multani Mitti to bathe or clean our hair”

“My grandparents prescribed cow dung for Medicinal purposes”

“We used to use salt & lemon to wash our dishes”

“ We used to use Neem to get rid of mosquitoes”

Over the last few years….the basics are now in place

Shani ‘s father dreamt of building a pucca house…but never had the resources to do so.

2 years back, Shani, with the support of the pradhan and the sarkar built his house.

Electricity is no longer an issue.

There is a water pump available in the village and one does not need to travel very far for the same. There is abundant supply of water.

With road network improving, Shani can travel to the nearby town Mandi to get a better price for this produce.

He is also in touch with the multiple middlemen through the phone to confirm the prevailing prices for crop produce.

Strong influencers in the village also

They now actively approach the ASHA didi and Anganwadi worker for nutritional aspects of their child.

When Shani built his house through government support, he was advised by the local community to make a toilet.

Shani and Saraswati visit the nearby Primary Health center for health related issue. While the PHC has been around for the last 5 years, they first went to PHC only last year after a referral from the ASHA didi.

Bhagmati has also learnt a set of good practices from school which she tries to get the family to do and practice.

Shani and family have started adopting new categories and brands

With improved connectivity with nearby town, Shani and family have access to new products that have replaced some traditional methods.

Now, they use soap which has replaced multani mitti. They have started using shampoo since soap can cause hair fall.

Saraswati started using fairness cream 3 years back. She is also getting bhagmati to use the same.

They moved to detergents to wash clothes only in the last 4 years of so.

In fact, this winter they used a liquid detergent for their winter wear for the first time. Shani’s sister from Lucknow recommended this when she visited them in October last year. This gives an added fragrance and keeps the material soft.

A lot of these kind of new products needed to be bought from the nearby town….. but now the village has Kishoreji who has opened a new store which has all the products that you get in the town. They do not need to go very far to get something.

But some things just don’t change….

Saraswati still uses cow dung to clean the house once in while.

They still burn neem leaves to drive out mosquitoes.

They still cook with a old style choolah.

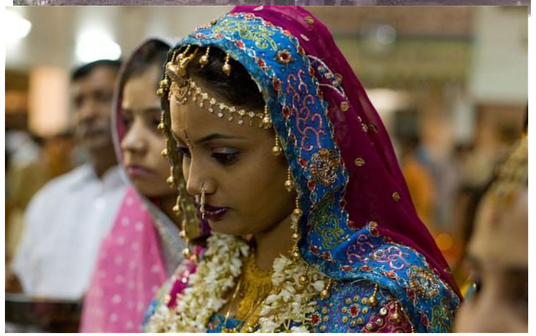

Shani & Saraswati have discussed about buying new modern day cooking equipment, but Shani has rejected the recommendation.

He does not see benefit in investing in the new equipment.

What does the future hold

Shani wants to increase his farm size in the years to come, but does not know where he is going to get the money from

He has to make the roof of his house pucca. Currently it is Kutcha

Both Shani & Saraswati are very keen that Bhagmati gets married to someone from their own caste. They have identified two prospects from nearby village. They have already started saving up for the marriage, but not sure it will be enough.

Their children have been pestering them to buy a TV for the house. Shani has looked around, but not bought the same yet.

Believe that education is a gateway to success

Shani & Saraswati did not go to school in their childhood. However, they believe that their children must be more educated

They initially sent them to school just for the mid day meal.

However, they believe that education should be the priority and are now evaluating sending Bhagmati and Ramesh to a new private school that has opened up, where all other villagers are sending their children. There is an additional cost of Rs 200 (Rs 100 per child) in fees….but they believe it will help

According to the villagers, the school has many more teachers and attendance of teachers is good.

They also excited about a Maha Vidyalay that has opened up in a nearby village which their children can eventually go to.

Shani believes that there is not much profit in Agriculture and his children must move out to the nearby town and get a job. However, he worries that urban life is hectic and lonely unlike the relaxed village life amidst the close community of the villagers
