THE BRIDGE SEQUENCE

Gap → Ramp → Weakest Lens → Kill List.

Every group's plan this week should be the same four-step sequence. Only the numbers change.

1

Calculate the Gap

₹4,00,000 – revenue to date. Divide by 4 weeks.

→ weekly ₹ target

2

Apply the Ramp

5–10% / 20–25% / 30% / 35–40%. Adjust for your stage.

→ Week 1 ₹ target

3

Weakest Lens

The one lens you'll fix this week. Other two get maintenance.

→ 1 weak lens to fix

4

Kill List

Work that doesn't move orders/day this week.

→ only revenue work

Step 4 · The Kill List

Work in your strongest lens. New product photography. New packaging. New logo. Repricing without proof.

Anything that doesn't move orders/day **this week** goes on the Kill List - not the to-do list.

Mesa SCHOOL OF BUSINESS

BREAK DOWN YOUR GOAL

Reverse-engineer the number.

Most first-time sellers plan to "sell as much as possible." That is not a plan - it is a hope. Force the math before any strategy conversation happens.

1 Target → Units → Actions

Revenue target ÷ price point = units needed. Then ÷ 28 days = units/day. Kill the flat assumption.

2 Back-loaded ramp

Week 1: 5–10% (you're learning) → Week 2: 20–25% (repeat what worked) → Week 3: 30% (scale) → Week 4: 35–40% (push + institutional).

3 Convert units → conversations

Retail cold conversion ≈ 10–20%. Personal network ≈ 40–60%. The number that should land: conversations per day, not units.

THE NUMBER

200

PEOPLE TO TALK TO

not "sell 71 units" but "talk to 200."

Founders who own the activity number hit target.

Mesa SCHOOL OF BUSINESS

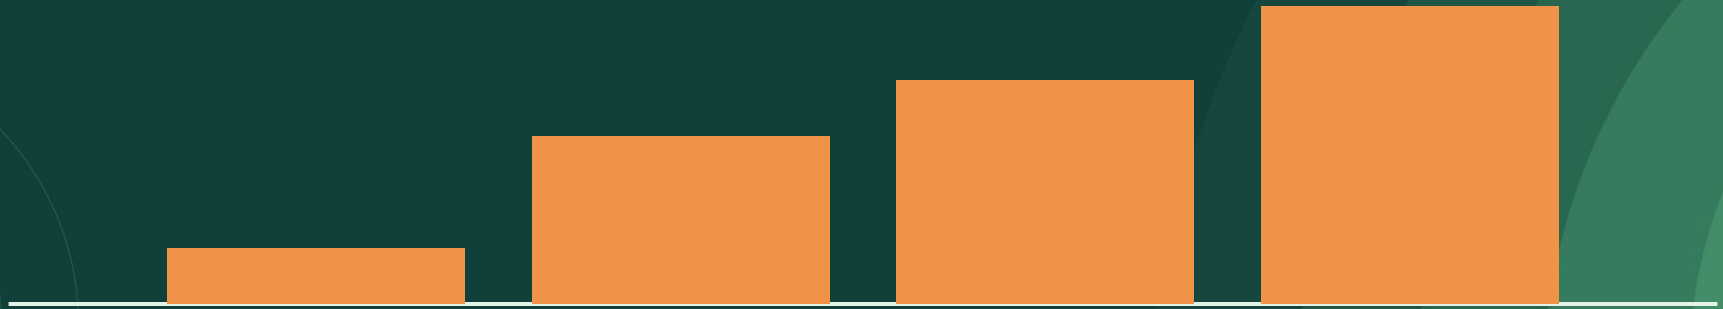

THIS IS HOW WEEKLY RAMP SHOULD LOOK LIKE

Back-loaded, not flat, never front-loaded.

The flat mental model dies in Week 1. The real shape builds - proof in Week 1 funds the conversations in Week 2, which fund the channel in Week 3, which unlock the big deal in Week 4.

WEEKLY % OF TOTAL TARGET

WEEK 1	WEEK 2	WEEK 3	WEEK 4
LEARN	REPEAT	SCALE	PUSH
collect proof	*retail begins*	*institutional 1st try*	*urgency + close*
7.5%	**22.5%**	**30%**	**40%**
~150 units	~450 units	~600 units	~800 units

EXAMPLE

₹4,00,000 in 4 weeks · 4-person team · ₹200 product.

STEP 1 · BASE MATH ₹4,00,000 ÷ ₹200 = **2,000 units** to sell in 28 days

WEEK	% OF TARGET	REVENUE	UNITS	UNITS/DAY	PER MEMBER / DAY
1	7.5%	₹30,000	150	~21	~5
2	22.5%	₹90,000	450	~64	~16
3	30%	₹1,20,000	600	~86	~21
4	40%	₹1,60,000	800	~114	~28
TOTAL	**100%**	**₹4,00,000**	**2,000**		

Mesa SCHOOL OF BUSINESS

BUILD A CHANNEL STRATEGY

Not all channels are Week 1 channels.

CHANNEL	SPEED TO CASH	CEILING	EFFORT TO START	BEST WEEK
Personal network, family, close circle	Fastest - same day	Low – Medium	Zero - your phone	WEEK 1
Pop-up / mall / street sampling	Fast - 1–2 days	Medium	Medium (permissions, stock, table)	WEEK 1–2
Small retail / kirana (consignment)	Medium - pitch + follow-up	Medium-High, recurring	Medium - relationship + logistics	WEEK 2–3
Society / office bulk (mini-B2B)	Medium	High per deal	Medium - needs a contact	WEEK 2–3
Large institutional sale (canteen, gifting)	Slow - needs credibility + proof	Highest single deal	High - needs relationships	WEEK 3–4

THE HUNT · WHERE PROSPECTS ACTUALLY LIVE

The daily hunt has its own ritual.

Prospecting and pitching are different jobs. Don't do them in the same time block. Prospect in the morning, pitch all day, follow up at night.

MORNING

Build today's list.

~30 min · 15 messages

5 personal-network referrals from yesterday's buyers

5 nearby shops not yet pitched (door-knock route)

5 society WhatsApp warm intros

MIDDAY

In-person hunt window.

10am – 5pm · pure movement

2 sampling locations (society gate, gym exit)

3 shop visits (1 revisit + 2 new)

1 unannounced office / canteen chat

EVENING

Warm follow-up

~30 min · no prospecting

3 re-engagement messages (Day 2 / 5 / 10)

Log every rejection reason in one shared sheet

Assign tomorrow's first 3 actions before logoff

SAMPLE MORNING PLAN

Daily Activity Stack.

Every team member runs the same daily stack. Specific actions, specific counts, specific times.

10:00 AM **Personal outreach**	Send 10 WhatsApp messages to classmates with the Direct Ask script.
1:00 PM **Sell in person**	Walk the campus. 5 direct conversations with strangers.
4:00 PM **Follow-up + referral ask**	Reply to every morning-DM. After every sale, log the learning
7:00 PM **Daily metric check**	Write in the group chat: messages sent, orders, revenue, new WhatsApp contacts.
9:00 PM **Sharpen the ask**	Group voice note (5 min). What worked, what didn't, what's tomorrow's first message.

THE MOST IGNORED ACTIVITY

The sale isn't the drop-off. It's the pickup.

Most first-time sellers do the close, then ghost. Repeat revenue lives in the next 10 days of small, low-pressure contact.

1

DAY 0

Sale or sample

Note exactly what was said (one line in your phone). This becomes the personalization for the next 3 touches.

2

DAY 2

"Did you try X?"

No pitch. Just a check-in. If a sample: ask the verdict. If a sale: ask if family tasted it.

DON'T RE-PITCH

3

DAY 5

Share proof, not push.

"Quick update - we've now sold [X] units in [Y] spots." A proof point bumps the read.

4

DAY 10

Referral ask or close.

"If this isn't for you, know 2 people who'd use it?" If no - politely close, log it as a no for now.

Revisit every stocked shop within 3–4 days, whether it sold or not. That's where the actual restock revenue lives.

Mesa
SCHOOL OF BUSINESS

ADAPT THE PITCH, BY CHANNEL

One pitch does not work across channels.

Shopkeepers, mall shoppers, and bulk buyers optimize for different things. Pitching all three the same way is the most common first-time-seller mistake.

A · CONSUMER PITCH

10–15 seconds. Emotion first.

Hook (a question or a taste) → one differentiator → one credibility line → ask for the small yes ("try it," not "buy it").

"Have you tried roasted makhana? Take a bite - no oil, no preservatives."

Bad: *"We sell healthy snacks with no preservatives, would you like to buy some?"*

B · RETAILER PITCH

Margin %, not the founder journey.

Shopkeepers don't care about mission - they care about margin, how fast it moves, and whether unsold stock comes back.

"X% margin for you, moves in Y days based on [nearby proof], I'll take back unsold. No risk."

Bad: *"We believe in healthy snacking and want to change lives…"*

C · BULK / INSTITUTIONAL

Use-case + volume. Trial order, not contract.

Identify the occasion (office snack budget, event gifting, canteen restock) → volume + price below retail → close with a low-friction trial order.

"Let's start with 20 units this week, not a 6-month contract. If it works, we scale."

Bad: *"We'd love to be your long-term snack partner for the next quarter…"*

Mesa SCHOOL OF BUSINESS

SOME SELLING LINES

Memorise these. Use them today.

1

The Direct Ask

"I'm trying to hit a target this week - would you be willing to try one?"

2

The Social Proof Trigger

"We've sold [X] of these this week - everyone who's tried it has come back for more."

3

The Scarcity Signal

"We only have [X] left this batch."

4

The Referral Ask

"If you liked it, is there one person you'd send my way? Just a message saying you tried it is enough."

OBJECTIONS & THE CLOSE

Four objections you'll hear on day one.

PATTERN: ACKNOWLEDGE → REFRAME → SMALL ASK

OBJECTION	RESPONSE PATTERN
"I don't need this"	Don't argue. Ask what they currently use instead - find the need gap.
"Too expensive"	Shift to per-serving / per-day cost, not total price.
"I'll think about it" (retail killer)	Convert to a small commitment: "can I leave 5 units on consignment, no upfront cost to you?"
"Not interested" (sampling)	Don't chase. Log it. Move on. Rejection rate is data, not a verdict on the product.

SMALL-YES LADDER: **sample → single unit → repeat / consignment → bulk. Never pitch the big yes on day one.**

DAILY STAND UP

Every day, three things in under a minute.

EVERY TEAM, EVERY DAY

· Today's actual vs target. · Which channel worked or didn't. · Tomorrow's specific action (who, where, what pitch).

TEAM OPS · SPLIT THE WORK AND DO RIGOROUS TRACKING

RETAIL

Wk 1 scouts shops. Wk 2–3 pitches and closes 15–20 shops. Wk 4 pushes urgency + closes remaining shops.

POP-UP / SAMPLING

Wk 1 runs the first session. Wk 2–3 runs both weekend pop-ups. Wk 4 runs the final blitz.

NETWORK + REFERRAL

Wk 1 sells into own circle. Wk 2–3 runs the referral ask. Wk 4 chases repeats.

OPS

Track numbers, build proof pack, close the institutional deal.

YOU ARE ACCOUNTABLE TO YOUR GROUP.

Mesa
SCHOOL OF BUSINESS

WEEK 0 · CLOSING

It's how many times you asked someone to buy.

The difference between the groups that hit ₹4L and the groups that don't is almost never the product.

Your plan is your operating document for the rest of BYOB

You have a plan. The only question is whether you execute it.

Think outside the box – AOV, Collab (Product / Distribution), Reseller, Language

Go sell something today.
